The Geological Society of America Bulletin
Subject Index to Volume 96 No. 1-12, 1985

absolute age *see also* geochronology; isotopes

absolute age—applications

aquifers: Process and rate of dedolomitization; mass transfer and ^{14}C dating in a regional carbonate aquifer; extended interpretation and reply
(Konikow, Leonard F., *et al.*) 8: 1096

ash-flow tuff: Correlation of ash-flow tuffs
(Hildreth, Wes, *et al.*) 7: 968

changes of level: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156

diagenesis: Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114

absolute age—dates

alluvium: Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas Fault, Cajon Pass, Southern California
(Weldon, Ray J., II, *et al.*) 6: 793

basalts: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83

biotite: Alleghanian deformation. and metamorphism in the eastern North Carolina Piedmont
(Russell, Gail S., *et al.*) 3: 381

— Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529

corals: Uranium-series dating of fossil corals from marine sediments of southeastern United States Atlantic Coastal Plain
(Szabo, Barney J.) 3: 398

diabase: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

granites: Rapid production of continental crust 1.7 to 1.9 b.y. ago; Nd isotopic evidence from the basement of the North American Midcontinent
(Nelson, Bruce K., *et al.*) 6: 746

igneous rocks: Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada
(Spencer, Jon E.) 9: 1140

lava: Late Cenozoic landscape evolution on lava flow surfaces of the Cima volcanic field, Mojave Desert, California
(Wells, Stephen G., *et al.*) 12: 1518

metamorphic rocks: $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England
(Sutter, John F., *et al.*) 1: 123

plutonic rocks: Isotopic studies of the late Archean plutonic rocks of the Wind River Range, Wyoming
(Stuckless, J. S., *et al.*) 7: 850

sandstone: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770

tuff: Geology and geochronology of the Tomochic Caldera, Chihuahua, Mexico
(Swanson, Eric R., *et al.*) 12: 1477

— K-Ar and $^{40}Ar/^{39}Ar$ dating of the hominid-bearing Pliocene-Pleistocene sequence at Koobi Fora, Lake Turkana, northern Kenya
(McDougall, Ian) 2: 159

volcanic rocks: Implications of the northwestwardly younger age of the volcanic rocks of west-central California
(Fox, Kenneth F., Jr., *et al.*) 5: 647

zircon: Carboniferous U-Pb age of the Sebago Batholith, southwestern Maine; metamorphic and tectonic implications
(Aleinikoff, John N., *et al.*) 8: 990

— Late Proterozoic and Devonian plutonic terrane within the Avalon Zone of Rhode Island
(Hermes, O. Don, *et al.*) 2: 272

— Petrology and provenance of pre-Late Devonian sandstones, Shoo Fly Complex, northern Sierra Nevada, California
(Girty, Gary H., *et al.*) 4: 516

— Provenance of the Silurian Elder Sandstone, north-central Nevada
(Girty, Gary H., *et al.*) 7: 925

— The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101

— Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493

— U-Pb ages from the Nipigon Plate and northern Lake Superior
(Davis, D. W., *et al.*) 12: 1572

absolute age—interpretation

diagenesis: Rb-Sr dating of diagenesis and source age of clays in Upper Devonian black shales of Texas
(Morton, John P.) 8: 1043

acoustical surveys *see under* geophysical surveys *under* Atlantic Ocean; Pacific Ocean

Africa *see also* Botswana; Cape Verde Islands; Kenya; Morocco; South Africa; Zimbabwe

Africa—stratigraphy

continental drift: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663

Paleozoic: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020

Proterozoic: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663

Alaska—geochemistry

trace elements: Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

Alaska—petrology

metamorphism: Structure, petrology, and metamorphic history of the Nome Group blueschist terrane, Salmon Lake area, Seward Peninsula, Alaska
(Thurston, Stephen Pollock) 5: 600

Alaska—stratigraphy

Quaternary: Eolian deflation by ancient katabatic winds; a late Quaternary example from the North Alaska Range
(Thorson, Robert M., *et al.*) 6: 702

Alaska—structural geology

tectonics: Origin and tectonic evolution of the Maclaren and Wrangellia terranes, eastern Alaska Range, Alaska
(Nokleberg, Warren J., *et al.*) 10: 1251

— Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

Alaska—tectonophysics

plate tectonics: Mechanisms of subduction accretion along the central Aleutian Trench
(McCarthy, Jill, *et al.*) 6: 691

— Origin and tectonic evolution of the Maclaren and Wrangellia terranes, eastern Alaska Range, Alaska
(Nokleberg, Warren J., *et al.*) 10: 1251

algae—stromatolites
Archean: Archean stromatolites from the Hartville Uplift, eastern Wyoming
(Hofmann, H. J., *et al.*) 7: 842

algal flora—diatom flora
Miocene: Depositional environments in the Monterey Formation, Cuyama Basin, California
(Lagoe, Martin B.) 10: 1296

algal flora—nannofossils
Cenozoic: Numerical ages of Cenozoic biostratigraphic datum levels; results of South Atlantic Leg 73 drilling; discussion and reply
(Bukry, David, *et al.*) 6: 813
Paleogene: Correlation of Gulf Coast provincial Paleogene stages with European standard stages
(Siesser, William G., *et al.*) 7: 827
Pliocene: Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529
Tertiary: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407

Alps *see also* the individual countries

Alps—structural geology
tectonics: Large-scale, thin-skinned thrusting in the southern Alps; kinematic models
(Laubscher, H. P.) 6: 710

ammonoids *see under* mollusks

ancient ice ages *see under* glacial geology

Andes *see also* the individual countries

Andes—petrology
metamorphism: Pre-Andean orogenesis in the Coast Ranges of central Chile
(Kato, Terence T.) 7: 918

Antarctica—structural geology
tectonics: Late Precambrian and early Paleozoic tectonism and associated sedimentation in northern Victoria Land, Antarctica
(Wright, Thomas O.) 10: 1332

Appalachians *see also* the individual states and provinces

Appalachians—geochemistry
trace elements: Ophiolitic source rocks for Taconic-age flysch; trace-element evidence; discussion and reply
(Shanmugam, G., *et al.*) 9: 1221

Appalachians—geochronology
Paleozoic: Alleghanian deformation and metamorphism in the eastern North Carolina Piedmont
(Russell, Gail S., *et al.*) 3: 381

Appalachians—petrology
metamorphism: A Proterozoic granulite-facies terrane on Roan Mountain, western Blue Ridge Belt, North Carolina-Tennessee
(Gulley, Gerald L., Jr.) 11: 1428
— Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588

Appalachians—stratigraphy
Proterozoic: Stratigraphy and tectonics of the Virginia-North Carolina Blue Ridge; evolution of a late Proterozoic-early Paleozoic hinge zone
(Wehr, Frederick, *et al.*) 3: 285

Appalachians—structural geology
deformation: Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian Orogen
(Lash, Gary G.) 9: 1167
— Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, Southern Appalachian foreland; a field test of theory
(Wiltschko, David V., *et al.*) 4: 426
tectonics: Alleghanian deformation and metamorphism in the eastern North Carolina Piedmont
(Russell, Gail S., *et al.*) 3: 381
— Tectonic evolution of the easternmost Piedmont, North Carolina
(Farrar, Stewart S.) 3: 362

Appalachians—tectonophysics
crust: Seismicity, seismic reflection, gravity, and geology of the central Virginia seismic zone; Part 3, Gravity
(Keller, M. R., *et al.*) 12: 1580
plate tectonics: Stratigraphy and tectonics of the Virginia-North Carolina Blue Ridge; evolution of a late Proterozoic-early Paleozoic hinge zone
(Wehr, Frederick, *et al.*) 3: 285

Arabian Peninsula *see also* Saudi Arabia

Arabian Peninsula—tectonophysics
plate tectonics: Pan-African microplate accretion of the Arabian Shield
(Stoeser, Douglas B., *et al.*) 7: 817

archaeology *see also under* stratigraphy *under* Great Plains

Archean *see also under* geochronology *under* Wyoming; *see also under* stratigraphy *under* Wyoming

archeology *see* archaeology *under* stratigraphy *under* Great Plains

Arctic Ocean—stratigraphy
Pleistocene: Sediments of the Lomonosov Ridge and Makarov Basin; a Pleistocene stratigraphy for the North Pole
(Morris, Thomas H., *et al.*) 7: 901

Arctic region *see also* the individual countries

Arizona—engineering geology
dams: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347

Arizona—petrology
metamorphic rocks: Geochemistry and origin of early Proterozoic supracrustal rocks, Dos Cabezas Mountains, southeastern Arizona
(Condie, Kent C., *et al.*) 5: 655

Arizona—stratigraphy
Cretaceous: The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona
(Harding, Lucy E., *et al.*) 6: 755
Proterozoic: Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover; discussion and reply
(Gray, Jane, *et al.*) 12: 1594

Arizona—structural geology
neotectonics: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347

Arkansas—sedimentary petrology
sedimentary rocks: Textures of Paleozoic chert and novaculite in the Ouachita Mountains of Arkansas and Oklahoma and their geological significance
(Keller, Walter D., *et al.*) 11: 1353

artifacts *see* archaeology *under* stratigraphy *under* Great Plains

Asia *see also* Arabian Peninsula; China; Pakistan

Atlantic Coastal Plain—geochronology
Pleistocene: Uranium-series dating of fossil corals from marine sediments of southeastern United States Atlantic Coastal Plain
(Szabo, Barney J.) 3: 398

Atlantic Coastal Plain—geophysical surveys
surveys: Geophysical evidence for an allochthonous Alleghanian(?) granitoid beneath the basement surface of the coastal plain near Lumberton, North Carolina
(Pratt, T. L., *et al.*) 8: 1070

Atlantic Coastal Plain—oceanography
continental margin: New York Bight Fault
(Hutchinson, D. R., *et al.*) 8: 975

Atlantic Ocean—engineering geology
slope stability: Late Quaternary slumps and debris flows on the Scotian Slope
(Piper, David J. W., *et al.*) 12: 1508

Atlantic Ocean—geophysical surveys
acoustical surveys: Late Pleistocene sedimentation on the continental slope and rise off western Nova Scotia
(Swift, Stephen A.) 7: 832
— Late Quaternary slumps and debris flows on the Scotian Slope
(Piper, David J. W., *et al.*) 12: 1508
seismic surveys: A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs
(Pinet, Paul R., *et al.*) 5: 618
— New York Bight Fault
(Hutchinson, D. R., *et al.*) 8: 975
— Shallow seismic stratigraphy and post-Albian geologic history of the northern and central Blake Plateau
(Pinet, Paul R., *et al.*) 5: 627
— The Goban Spur transect; geologic evolution of a sediment-starved passive continental margin
(de Graciansky, Pierre Charles, *et al.*) 1: 58

Atlantic Ocean—oceanography
ocean floors: Erosional modification of Bahama Escarpment
(Freeman-Lynde, R. P., *et al.*) 4: 481

Atlantic Ocean—stratigraphy
Cenozoic: A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs
(Pinet, Paul R., *et al.*) 5: 618
— Numerical ages of Cenozoic biostratigraphic datum levels; results of South Atlantic Leg 73 drilling; discussion and reply
(Bukry, David, *et al.*) 6: 813
— Shallow seismic stratigraphy and post-Albian geologic history of the northern and central Blake Plateau
(Pinet, Paul R., *et al.*) 5: 627
Cretaceous: A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs
(Pinet, Paul R., *et al.*) 5: 618
— Shallow seismic stratigraphy and post-Albian geologic history of the northern and central Blake Plateau
(Pinet, Paul R., *et al.*) 5: 627
Pliocene: Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495

Atlantic Ocean—tectonophysics
sea-floor spreading: The Goban Spur transect; geologic evolution of a sediment-starved passive continental margin
(de Graciansky, Pierre Charles, *et al.*) 1: 58

Atlantic Ocean Islands *see also* Cape Verde Islands

Atlantic region *see also* the individual countries

Atlantic region—stratigraphy
Ordovician: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; discussion and reply
(Harper, D. A. T., *et al.*) 12: 1597
— Geology and paleobiology of islands in the Ordovician Iapetus Ocean; review and implications; discussion and reply
(Gibbons, Wes, *et al.*) 9: 1225
Paleozoic: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020

Australasia *see also* New Zealand

Australia *see also* Queensland; Victoria

Australia—geochronology
Pleistocene: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156

Australia—stratigraphy
changes of level: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156

Bahamas—oceanography
continental margin: Erosional modification of Bahama Escarpment
(Freeman-Lynde, R. P., *et al.*) 4: 481

Baltic region *see also* the individual countries

Barbados—structural geology
tectonics: Tectonic relationships between forearc-basin strata and the accretionary complex at Bath, Barbados
(Torrini, Rudolph, Jr., *et al.*) 7: 861

basalts *see under* igneous rocks

Basin and Range Province—structural geology
neotectonics: Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada
(Spencer, Jon E.) 9: 1140
tectonics: The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona
(Harding, Lucy E., *et al.*) 6: 755

Basin and Range Province—tectonophysics
crust: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347

batholiths *see under* intrusions

Belgium—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567

bibliography *see also under* structural geology *under* New England

biogeography—gymnosperm flora
Quaternary: Late Quaternary vegetation near Battle Ground Lake, southern Puget Trough, Washington
(Barnosky, Cathy W.) 2: 263

biogeography—mollusks
Jurassic: The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050

biogeography—Ordovician
Atlantic region: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; discussion and reply
(Harper, D. A. T., *et al.*) 12: 1597
Wales: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; review and implications; discussion and reply
(Gibbons, Wes, *et al.*) 9: 1225

biography—general
Broecker, Wallace Smith: Presentation of the Arthur L. Day Medal to Wallace Smith Broecker
(Takahashi, Taro, *et al.*) 9: 1196
Colman, Steven M.: Presentation of the Kirk Bryan Award to Steven M. Colman
(Pierce, Kenneth L., *et al.*) 9: 1209
Coney, Peter J.: Presentation of Structural Geology and Tectonics Division Best Paper Award to Peter J. Coney, David L. Jones, James W. H. Monger
(Helwig, James A., *et al.*) 9: 1211
Haynes, C. Vance, Jr.: Presentation of the Archaeological Geology Award to C. Vance Haynes, Jr.
(Albritton, Claude C., Jr., *et al.*) 9: 1198
Hunt, Roy E.: Presentation of the E. B. Burwell, Jr., Memorial Award to Roy E. Hunt
(Wilson, Frank W., *et al.*) 9: 1200
Jones, David L.: Presentation of Structural Geology and Tectonics Division Best Paper Award to Peter J. Coney, David L. Jones, James W. H. Monger
(Helwig, James A., *et al.*) 9: 1211
Monger, James W. H.: Presentation of Structural Geology and Tectonics Division Best Paper Award to Peter J. Coney, David L. Jones, James W. H. Monger
(Helwig, James A., *et al.*) 9: 1211
Rabbitt, Mary Collins: Presentation of History of Geology Division Award to Mary Collins Rabbitt
(Peck, Dallas L., *et al.*) 9: 1203
Schwartz, Franklin W.: Presentation of the O. E. Meinzer Award to Franklin W. Schwartz, Leslie Smith
(Domenico, Patrick A., *et al.*) 9: 1205

Smith, Leslie: Presentation of the O. E. Meinzer Award to Franklin W. Schwartz, Leslie Smith
(Domenico, Patrick A., *et al.*) 9: 1205
Talwani, Manik: Presentation of the George P. Woollard Award to Manik Talwani
(Dehlinger, Peter, *et al.*) 9: 1202
Wetherill, George W.: Presentation of the G. K. Gilbert Award to George W. Wetherill
(Shoemaker, Eugene M., *et al.*) 9: 1207
White, Donald E.: Presentation of the Penrose Medal to Donald E. White
(Muffler, L. J. Patrick, *et al.*) 9: 1194

Botswana—stratigraphy
Proterozoic: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663

brachiopods—biogeography
Ordovician: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; review and implications; discussion and reply
(Gibbons, Wes, *et al.*) 9: 1225

brachiopods—biostratigraphy
Silurian: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384

British Columbia—geomorphology
fluvial features: Morphology of a delta prograding by bulk sediment transport
(Kenyon, P. M., *et al.*) 11: 1457

British Columbia—mineralogy
organic compounds: Eocene amber from the Pacific Coast of North America
(Mustoe, George E.) 12: 1530

British Columbia—structural geology
tectonics: Major dextral transcurrent displacements along the northern Rocky Mountain Trench and related lineaments in north-central British Columbia
(Gabrielse, H.) 1: 1

California—geochemistry
trace elements: Petrologic evidence for Jurassic, island-arc-like basement rocks in the southwestern Transverse Ranges and California continental borderland
(Sorensen, Sorena) 8: 997

California—geochronology
Cenozoic: Implications of the northwestwardly younger age of the volcanic rocks of west-central California
(Fox, Kenneth F., Jr., *et al.*) 5: 647
Holocene: Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas Fault, Cajon Pass, Southern California
(Weldon, Ray J., II, *et al.*) 6: 793
Miocene: Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada
(Spencer, Jon E.) 9: 1140
Paleozoic: Petrology and provenance of pre-Late Devonian sandstones, Shoo Fly Complex, northern Sierra Nevada, California
(Girty, Gary H., *et al.*) 4: 516

California—geomorphology
landform evolution: Late Cenozoic landscape evolution on lava flow surfaces of the Cima volcanic field, Mojave Desert, California
(Wells, Stephen G., *et al.*) 12: 1518

California—seismology
earthquakes: Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas Fault, Cajon Pass, Southern California
(Weldon, Ray J., II, *et al.*) 6: 793

California—stratigraphy
Cretaceous: The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona
(Harding, Lucy E., *et al.*) 6: 755
Mesozoic: Stratigraphic and sedimentologic evidence of a submarine island-arc volcano in the lower Mesozoic Penon Blanco and Jasper Point formations, Mariposa County, California
(Bogen, Nicholas L.) 10: 1322
Miocene: Depositional environments in the Monterey Formation, Cuyama Basin, California
(Lagoe, Martin B.) 10: 1296
Proterozoic: Glacial and syntectonic sedimentation; the upper Proterozoic Kingston Peak Formation, southern Panamint Range, eastern California
(Miller, Julia M. G.) 12: 1537

California—structural geology
neotectonics: Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas Fault, Cajon Pass, Southern California
(Weldon, Ray J., II, *et al.*) 6: 793
— Modern tectonic cracking near the Garlock Fault, California
(Zellmer, John T., *et al.*) 8: 1037
tectonics: Structure and tectonics of the northern Sierra Nevada
(Day, Howard W., *et al.*) 4: 436
— Tectonic setting of the southern Cascade Range as interpreted from its magnetic and gravity fields
(Blakely, Richard J., *et al.*) 1: 43
— Tectonics of the Seiad Massif, northern Klamath Mountains, California
(Cannat, M.) 1: 15
— Timing and structural expression of the Nevadan Orogeny, Sierra Nevada, California; discussions and reply
(Bhattacharyya, Tapas, *et al.*) 10: 1346

California—tectonophysics
plate tectonics: Implications of the northwestwardly younger age of the volcanic rocks of west-central California
(Fox, Kenneth F., Jr., *et al.*) 5: 647

Canada *see also* Appalachians; Atlantic Coastal Plain; British Columbia; Canadian Shield; Great Lakes; Great Lakes region; Great Plains; Newfoundland; Nova Scotia; Ontario; Rocky Mountains

Canada—oceanography
continental margin: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83

Canada—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567

Canadian Shield—geochronology
Proterozoic: U-Pb ages from the Nipigon Plate and northern Lake Superior
(Davis, D. W., *et al.*) 12: 1572

Cape Verde Islands—stratigraphy
Cretaceous: Mesozoic deep-water and Tertiary volcaniclastic deposition of Maio, Cape Verde Island; discussion and reply
(Milam, Robert W., *et al.*) 6: 816

carbon—isotopes
C-13/C-12: Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737

carbonate rocks *see under* sedimentary rocks

Carboniferous *see also under* geochronology *under* Maine

Caribbean region *see also* the individual countries

Caribbean region—tectonophysics
plate tectonics: Tectonic relationships between forearc-basin strata and the accretionary complex at Bath, Barbados
(Torrini, Rudolph, Jr., *et al.*) 7: 861
— The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050

Carpathians *see also* the individual countries
Cenozoic *see also* Neogene; Paleogene; Tertiary; *see also under* geochronology *under* California; Pakistan; *see also under* stratigraphy *under* Atlantic Ocean
Cenozoic—geochronology
time scales: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407
Central America *see also* Nicaragua
Central America—petrology
volcanism: Tephrochronology of marine tephra adjacent to Central America
(Ledbetter, Michael T.) 1: 77
changes of level *see also under* stratigraphy *under* Australia; New Zealand; Queensland; Victoria
Chile—structural geology
orogeny: Pre-Andean orogenesis in the Coast Ranges of central Chile
(Kato, Terence T.) 7: 918
China—stratigraphy
Silurian: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384
China—tectonophysics
plate tectonics: An outline of the plate tectonics of China; discussion and reply
(Klimetz, Michael P., *et al.*) 3: 407
chromium—geochemistry
flysch: Ophiolitic source rocks for Taconic-age flysch; trace-element evidence; discussion and reply
(Shanmugam, G., *et al.*) 9: 1221
clastic rocks *see under* sedimentary rocks
clastic sediments *see under* sediments
clay mineralogy—areal studies
District of Columbia: Saprolite formation beneath coastal plain sediments near Washington, D.C.
(Pavich, M. J., *et al.*) 7: 886
Texas: Rb-Sr dating of diagenesis and source age of clays in Upper Devonian black shales of Texas
(Morton, John P.) 8: 1043
— Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114
clay mineralogy—experimental studies
diagenesis: Sediment-sea-water interaction at 200 and 300°C, 500 bars pressure; the role of sediment composition in diagenesis and low-grade metamorphism of marine clay
(Thornton, Edward C., *et al.*) 10: 1287
climate, ancient *see* paleoclimatology
Colorado—geochronology
Paleozoic: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364
Colorado—stratigraphy
Proterozoic: Revised interpretation of the age of allochthonous rocks of the Uncompahgre Formation, Needle Mountains, Colorado
(Tewksbury, B. J.) 2: 224
Colorado—structural geology
tectonics: Revised interpretation of the age of allochthonous rocks of the Uncompahgre Formation, Needle Mountains, Colorado
(Tewksbury, B. J.) 2: 224
Colorado Plateau *see also* the individual states
Colorado Plateau—geomorphology
processes: Sapping processes and the development of theater-headed valley networks on the Colorado Plateau
(Laity, Julie E., *et al.*) 2: 203
Colorado Plateau—stratigraphy
Permian: Paleomagnetic and petrologic evidence bearing on the age and origin of uranium deposits in the Permian Cutler Formation, Lisbon Valley, Utah
(Reynolds, Richard L., *et al.*) 6: 719
Columbia Plateau *see also* the individual states
Columbia Plateau—petrology
igneous rocks: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676
Columbia Plateau—stratigraphy
Pleistocene: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271
connate waters *see under* ground water
Connecticut—petrology
igneous rocks: Differentiation of Mesozoic basalts of the Hartford Basin, Connecticut
(Philpotts, Anthony R., *et al.*) 9: 1131
Connecticut—structural geology
tectonics: Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227
conodonts—biostratigraphy
Devonian: Correlation of the subsurface Lower and Middle Devonian of the Lake Erie region; alternative interpretation and reply
(Sparling, Dale R., *et al.*) 9: 1213
— Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567
— Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595
conodonts—paleoecology
Mississippian: Defining the nature and location of a Late Devonian-Early Mississippian pycnocline in eastern Kentucky
(Ettensohn, Frank R., *et al.*) 10: 1313
conservation *see also* land use; reclamation
continental drift *see also under* stratigraphy *under* Africa
continental drift—Gondwana
Arabian Peninsula: Pan-African microplate accretion of the Arabian Shield
(Stoeser, Douglas B., *et al.*) 7: 817
Atlantic region: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020
continental drift—Pangaea
Venezuela: The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050
continental margin *see also under* oceanography *under* Atlantic Coastal Plain; Bahamas; Canada; Europe
continental shelf *see also under* oceanography *under* New Jersey; New York; Nova Scotia
continental slope *see also under* oceanography *under* Ireland; Nova Scotia
Cretaceous *see also under* stratigraphy *under* Arizona; Atlantic Ocean; California; Cape Verde Islands; Mexico; Oregon
Cretaceous—geochronology
time scales: A Cretaceous and Jurassic geochronology
(Kent, Dennis V., *et al.*) 11: 1419
crust *see also under* tectonophysics *under* Appalachians; Basin and Range Province; North America
crystal chemistry *see also* minerals
crystal growth *see also* minerals
crystal structure *see also* minerals
dams *see also under* engineering geology *under* Arizona; Nevada
deformation *see also* structural analysis
deformation—field studies
strain: Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian Orogen
(Lash, Gary G.) 9: 1167
— Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, Southern Appalachian foreland; a field test of theory
(Wiltschko, David V., *et al.*) 4: 426

— Florence-Niagara Terrane; an early Proterozoic accretionary complex, Lake Superior region, U.S.A.
(Larue, D. K., *et al*) 9: 1179
— Modern tectonic cracking near the Garlock Fault, California
(Zellmer, John T., *et al*) 8: 1037
stress: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al*) 3: 347

deltas *see under* fluvial features *under* geomorphology

deposition of ores *see* mineral deposits, genesis

Devonian *see also under* geochronology *under* Rhode Island; *see also under* stratigraphy *under* Belgium; Canada; Europe; Germany; Great Lakes region; Kentucky; New York; North America; Ohio; Ontario; Virginia; West Virginia; Western U.S.

diagenesis *see also* sedimentation

diagenesis—dolomitization
dedolomitization: Process and rate of dedolomitization; mass transfer and ^{14}C dating in a regional carbonate aquifer; extended interpretation and reply
(Konikow, Leonard F., *et al*) 8: 1096

diagenesis—experimental studies
absolute age: Rb-Sr dating of diagenesis and source age of clays in Upper Devonian black shales of Texas
(Morton, John P.) 8: 1043

diagenesis—geochemistry
trace elements: Sediment-sea-water interaction at 200 and 300°C, 500 bars pressure; the role of sediment composition in diagenesis and low-grade metamorphism of marine clay
(Thornton, Edward C., *et al*) 10: 1287

diagenesis—indicators
stable isotopes: Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al*) 6: 737
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover; discussion and reply
(Gray, Jane, *et al*) 12: 1594

diagenesis—processes
burial diagenesis: Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114

diastrophism *see* orogeny

diatom flora *see under* algal flora

differentiation *see under* magmas

dikes *see under* intrusions

dinoflagellates *see under* palynomorphs

diorites *see under* igneous rocks

District of Columbia—sedimentary petrology
weathering: Saprolite formation beneath coastal plain sediments near Washington, D.C.
(Pavich, M. J., *et al*) 7: 886

dolomitization *see under* diagenesis

earthquakes *see under* seismology; *see also* seismology; *see also under* seismology *under* California; Virginia

earthquakes—effects
landslides: Landslides caused by earthquakes; discussion and reply
(Youd, T. Leslie, *et al*) 8: 1091

Eastern Hemisphere *see also* Africa; Antarctica; Arctic Ocean; Atlantic Ocean; Europe; Indian Ocean; USSR

Eastern U.S. *see also* Connecticut; District of Columbia; Maine; Maryland; Massachusetts; New England; New Hampshire; New Jersey; New York; North Carolina; Pennsylvania; Rhode Island; Vermont; Virginia; West Virginia

engineering geology *see also* deformation; earthquakes; geologic hazards; ground water; land use; rock mechanics; slope stability; soil mechanics

environmental geology *see also* geologic hazards; land use; reclamation

Eocene *see also under* geochronology *under* Oregon

epeirogeny *see also* neotectonics; orogeny

erosion *see under* processes *under* geomorphology

erosion features *see under* geomorphology

eruptive rocks *see* igneous rocks

eskers *see under* glacial features *under* glacial geology

Europe *see also* Alps; Belgium; Germany; Ireland; Norway; Scandinavia; Switzerland; Wales; West Germany

Europe—geochronology
Quaternary: Laacher See Tephra; a widespread isochronous late Quaternary tephra layer in Central and Northern Europe
(van den Bogaard, Paul, *et al*) 12: 1554

Europe—oceanography
continental margin: The Goban Spur transect; geologic evolution of a sediment-starved passive continental margin
(de Graciansky, Pierre Charles, *et al*) 1: 58

Europe—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al*) 5: 567
— Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595
Paleogene: Correlation of Gulf Coast provincial Paleogene stages with European standard stages
(Siesser, William G., *et al*) 7: 827

experimental studies *see under* clay mineralogy; diagenesis; *see under* magmas *under* phase equilibria

Far East *see also* the individual countries

faulting *see* faults

faults *see also* folds

faults—displacements
active faults: Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas Fault, Cajon Pass, Southern California
(Weldon, Ray J., II, *et al*) 6: 793
— Modern tectonic cracking near the Garlock Fault, California
(Zellmer, John T., *et al*) 8: 1037
normal faults: Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada
(Spencer, Jon E.) 9: 1140
overthrust faults: Structure and tectonics of the northern Sierra Nevada
(Day, Howard W., *et al*) 4: 436
thrust faults: Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, Southern Appalachian foreland; a field test of theory
(Wiltschko, David V., *et al*) 4: 426
— Large-scale, thin-skinned thrusting in the southern Alps; kinematic models
(Laubscher, H. P.) 6: 710
— Revised interpretation of the age of allochthonous rocks of the Uncompahgre Formation, Needle Mountains, Colorado
(Tewksbury, B. J.) 2: 224
— Structure of the Vakhsh fold-and-thrust belt, Tadjik SSR; geologic mapping on a Landsat image base
(Leith, William, *et al*) 7: 875
— Tectonics of the Seiad Massif, northern Klamath Mountains, California
(Cannat, M.) 1: 15
transcurrent faults: Major dextral transcurrent displacements along the northern Rocky Mountain Trench and related lineaments in north-central British Columbia
(Gabrielse, H.) 1: 1
wrench faults: Stratigraphy and sedimentology of Upper Cretaceous rocks in coastal Southwest Oregon; evidence for wrench-fault tectonics in a postulated accretionary terrane
(Bourgeois, Joanne, *et al*) 8: 1007

faults—distribution
growth faults: New York Bight Fault
(Hutchinson, D. R., *et al*) 8: 975

faults—mechanics
extension: Gravity-spreading origin of the Heart Mountain Allochthon, northwestern Wyoming
(Haugh, Thomas A.) 11: 1440
stress: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347

faults—patterns
en echelon faults: Nontransform offsets of the Pacific-Cocos plate boundary and their traces on the rise flank
(Lonsdale, Peter) 3: 313

faults—systems
grabens: Early Jurassic sedimentation of a rift-valley lake; Culpeper Basin, northern Virginia
(Hentz, Tucker F.) 1: 92
rift zones: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

Federal Republic of Germany *see* West Germany

Fiji—stratigraphy
Pliocene: Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529

fission-track dating *see under* geochronology

fluvial features *see under* geomorphology

folding *see* folds

folds *see also* faults

folds—distribution
fold belts: Structure of the Vakhsh fold-and-thrust belt, Tadjik SSR; geologic mapping on a Landsat image base
(Leith, William, *et al.*) 7: 875

folds—orientation
nappes: Tectonic relationships between forearc-basin strata and the accretionary complex at Bath, Barbados
(Torrini, Rudolph, Jr., *et al.*) 7: 861
superposed folds: Structure and tectonics of the northern Sierra Nevada
(Day, Howard W., *et al.*) 4: 436
— The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101

foliation *see also* folds; structural analysis

foraminifera *see also* foraminifers

foraminifers—biostratigraphy
Cenozoic: Numerical ages of Cenozoic biostratigraphic datum levels; results of South Atlantic Leg 73 drilling; discussion and reply
(Bukry, David, *et al.*) 6: 813
Cretaceous: Mesozoic deep-water and Tertiary volcaniclastic deposition of Maio, Cape Verde Island; discussion and reply
(Milam, Robert W., *et al.*) 6: 816
Miocene: Depositional environments in the Monterey Formation, Cuyama Basin, California
(Lagoe, Martin B.) 10: 1296
Pleistocene: Sediments of the Lomonosov Ridge and Makarov Basin; a Pleistocene stratigraphy for the North Pole
(Morris, Thomas H., *et al.*) 7: 901
Pliocene: Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529
Tertiary: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407

foraminifers—paleoecology
Holocene: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part I, Evidence from Recent to late Holocene foraminiferal assemblages
(Williams, Douglas F., *et al.*) 2: 176
Pleistocene: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190
Pliocene: Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495

fossils *see* appropriate fossil group

foundations *see also* rock mechanics; soil mechanics

fractures—style
joints: Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, Southern Appalachian foreland; a field test of theory
(Wiltschko, David V., *et al.*) 4: 426

fractures—theoretical studies
frost action: A theoretical model of the fracture of rock during freezing
(Walder, Joseph Scott, *et al.*) 3: 336

frost action *see under* geomorphology; rock mechanics

genesis of ore deposits *see* mineral deposits, genesis

geochronology *see also* absolute age

geochronology—fission-track dating
volcanic rocks: Implications of the northwestwardly younger age of the volcanic rocks of west-central California
(Fox, Kenneth F., Jr., *et al.*) 5: 647

geochronology—paleomagnetism
magnetostratigraphy: Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529
— Paleomagnetism and oxide mineralogy of Upper Triassic to Lower Jurassic red beds and basalts in the Newark Basin
(McIntosh, W. C., *et al.*) 4: 463
— The magnetostratigraphy, fission-track dating, and stratigraphic evolution of the Peshawar intermontane basin, northern Pakistan
(Burbank, Douglas W., *et al.*) 4: 539

geochronology—racemization
correlation: Uranium-series dating of fossil corals from marine sediments of southeastern United States Atlantic Coastal Plain
(Szabo, Barney J.) 3: 398
lake sediments: Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlation; discussion and reply
(Gadd, Nelson R., *et al.*) 9: 1223

geochronology—tephrochronology
correlation: Correlation of ash-flow tuffs
(Hildreth, Wes, *et al.*) 7: 968
— Quaternary volcanic stratigraphy of Managua, Nicaragua; correlation and source assignment for multiple overlapping plinian deposits
(Bice, David C.) 4: 533
isochrons: Laacher See Tephra; a widespread isochronous late Quaternary tephra layer in Central and Northern Europe
(van den Bogaard, Paul, *et al.*) 12: 1554
marine sediments: Tephrochronology of marine tephra adjacent to Central America
(Ledbetter, Michael T.) 1: 77

geochronology—time scales
Cenozoic: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407
Mesozoic: A Cretaceous and Jurassic geochronology
(Kent, Dennis V., *et al.*) 11: 1419
Pliocene: K-Ar and $^{40}Ar/^{39}Ar$ dating of the hominid-bearing Pliocene-Pleistocene sequence at Koobi Fora, Lake Turkana, northern Kenya
(McDougall, Ian) 2: 159

geologic hazards *see also* earthquakes

geologic hazards—landslides
earthquakes: Landslides caused by earthquakes; discussion and reply
(Youd, T. Leslie, *et al.*) 8: 1091

geologic time *see* absolute age; geochronology

geomorphology *see also* glacial geology

geomorphology—erosion features
badlands: Topographic inversion of badland buttes in Montana
(Donahue, John J.) 7: 911

geomorphology—fluvial features
deltas: Morphology of a delta prograding by bulk sediment transport
(Kenyon, P. M., *et al.*) 11: 1457
meanders: Fundamental characteristics of stream meanders; discussion
(Tanner, William F.) 8: 1095
rivers: Response of alluvial rivers to slow active tectonic movement
(Ouchi, Shunji) 4: 504

geomorphology—frost action
degradation: A theoretical model of the fracture of rock during freezing
(Walder, Joseph Scott, *et al.*) 3: 336

geomorphology—landform evolution
landscapes: Late Cenozoic landscape evolution on lava flow surfaces of the Cima volcanic field, Mojave Desert, California
(Wells, Stephen G., *et al.*) 12: 1518
tectonic controls: Topographic lineament swarms; clues to their origin from domain analysis of Italy
(Wise, Donald U., *et al.*) 7: 952

geomorphology—mass movements
lahars: Initiation and flow behavior of the 1980 Pine Creek and Muddy River lahars, Mount St. Helens, Washington
(Pierson, Thomas C.) 8: 1056

geomorphology—processes
erosion: Bank-erosion processes in a cool-temperate environment, Orwell Lake, Minnesota
(Reid, John R., Jr.) 6: 781
— Eolian deflation by ancient katabatic winds; a late Quaternary example from the North Alaska Range
(Thorson, Robert M., *et al.*) 6: 702
— Sapping processes and the development of theater-headed valley networks on the Colorado Plateau
(Laity, Julie E., *et al.*) 2: 203
sedimentation: Bed microtopography and entrainment thresholds in gravel-bed rivers
(Brayshaw, Andrew C.) 2: 218

geomorphology—shore features
coastal dunes: Storm-controlled oblique dunes of the Oregon coast; discussion and reply
(Carson, Michael A., *et al.*) 3: 409
coastlines: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156

geophysical surveys *see under* Atlantic Coastal Plain; Atlantic Ocean; North Carolina; Pacific Ocean; USSR; Virginia; *see* acoustical surveys *under* geophysical surveys *under* Atlantic Ocean; Pacific Ocean; *see* gravity surveys *under* geophysical surveys *under* Virginia; *see* seismic surveys *under* geophysical surveys *under* Atlantic Ocean; North Carolina; Pacific Ocean; *see* surveys *under* geophysical surveys *under* Atlantic Coastal Plain

geophysics *see also* deformation

geosynclines *see also* orogeny

Germany *see also* West Germany

Germany—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567

glacial geology *see also* geomorphology

glacial geology—ancient ice ages
Ordovician: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384
Paleozoic: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020
Proterozoic: Glacial and syntectonic sedimentation; the upper Proterozoic Kingston Peak Formation, southern Panamint Range, eastern California
(Miller, Julia M. G.) 12: 1537

glacial geology—glacial features
eskers: Esker characteristics in terms of glacier physics, Katahdin esker system, Maine
(Shreve, Ronald L.) 5: 639
glacial lakes: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271

glacial geology—glaciation
deglaciation: Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlation; discussion and reply
(Gadd, Nelson R., *et al.*) 9: 1223
deposition: Till stratigraphy in the St. Lawrence Valley near Malone, New York; revised glacial history and stratigraphic nomenclature; discussion and reply
(Dreimanis, Aleksis, *et al.*) 1: 155
ice movement: Correlation of late Wisconsin glacial phases in the western Great Lakes area
(Attig, John W., *et al.*) 12: 1585

glacial geology—glaciers
meltwater: Subglacial hydrology and sediment transport at Bondhusbreen, Southwest Norway
(Hooke, Roger LeB., *et al.*) 3: 388

glacial lakes *see under* glacial features *under* glacial geology

glaciation *see under* glacial geology

glaciers *see under* glacial geology

Gondwana *see under* continental drift

grabens *see under* systems *under* faults

granites *see under* igneous rocks

graptolites—biostratigraphy
Silurian: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384

Graptolithina *see also* graptolites

gravity surveys *see under* geophysical surveys *under* Virginia

Great Basin *see also* the individual states

Great Basin—stratigraphy
Paleocene: The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona
(Harding, Lucy E., *et al.*) 6: 755

Great Britain *see also* Wales

Great Lakes—geochronology
Pleistocene: Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlation; discussion and reply
(Gadd, Nelson R., *et al.*) 9: 1223

Great Lakes region *see also* the individual states and provinces

Great Lakes region—economic geology
iron ores: Sedimentological constraints on the origins of Precambrian iron-formations
(Simonson, Bruce M.) 2: 244

Great Lakes region—geochronology
Proterozoic: U-Pb ages from the Nipigon Plate and northern Lake Superior
(Davis, D. W., *et al.*) 12: 1572

Great Lakes region—stratigraphy
Devonian: Correlation of the subsurface Lower and Middle Devonian of the Lake Erie region; alternative interpretation and reply
(Sparling, Dale R., *et al.*) 9: 1213
Pleistocene: Correlation of late Wisconsin glacial phases in the western Great Lakes area
(Attig, John W., *et al.*) 12: 1585

Great Lakes region—structural geology
structural analysis: Florence-Niagara Terrane; an early Proterozoic accretionary complex, Lake Superior region, U.S.A.
(Larue, D. K., *et al.*) 9: 1179

Great Plains *see also* the individual states and provinces

Great Plains—stratigraphy
archaeology: Archaeological geology of the Lubbock Lake site, southern High Plains of Texas
(Holliday, Vance T.) 12: 1483

ground water *see also* hydrology

ground water—age
absolute age: Process and rate of dedolomitization; mass transfer and ^{14}C dating in a regional carbonate aquifer; extended interpretation and reply
(Konikow, Leonard F., *et al.*) 8: 1096

ground water—connate waters
theoretical studies: The displacement of connate water from aquifers
(Domenico, P. A., *et al.*) 3: 328

ground water—levels
changes: Simulation of changes in ground-water levels associated with strip mining
(Schwartz, Franklin W., *et al.*) 2: 253

Gulf Coastal Plain *see also* the individual states and countries

Gulf Coastal Plain—geochronology
Oligocene: Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114

Gulf Coastal Plain—geomorphology
fluvial features: Morphology of a delta prograding by bulk sediment transport
(Kenyon, P. M., *et al.*) 11: 1457

Gulf Coastal Plain—stratigraphy
Paleogene: Correlation of Gulf Coast provincial Paleogene stages with European standard stages
(Siesser, William G., *et al.*) 7: 827

heat flow *see also under* geophysical surveys *under* North Carolina; *see also under* tectonophysics *under* Pacific Ocean

Himalayas *see also* the individual countries

Holocene *see also under* geochronology *under* California; *see also under* stratigraphy *under* Indian Ocean

hydrogeology *see also* ground water; hydrology

hydrology *see also* ground water

hydrology—surveys
Norway: Subglacial hydrology and sediment transport at Bondhusbreen, Southwest Norway
(Hooke, Roger LeB., *et al.*) 3: 388

ice ages *see* glacial geology

Idaho—petrology
igneous rocks: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676
metamorphism: Metamorphism of pelitic rocks in the Snow Peak area, northern Idaho; sequence of events and regional implications
(Lang, Helen M., *et al.*) 6: 731

Idaho—stratigraphy
Pleistocene: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271

igneous rocks *see also* intrusions; lava; magmas; metamorphic rocks; phase equilibria

igneous rocks—basalts
genesis: Differentiation of Mesozoic basalts of the Hartford Basin, Connecticut
(Philpotts, Anthony R., *et al.*) 9: 1131
— Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676

igneous rocks—diorites
trondhjemite: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493

igneous rocks—geochemistry
trace elements: High-potassium intrusive rocks of the Crandall ring-dike complex, Absaroka Mountains, Wyoming
(Kudo, A. M., *et al.*) 4: 522

igneous rocks—granites
genesis: Emplacement of the zoned Zaer Pluton, Morocco
(Mahmood, Ahmed) 7: 931
geochemistry: Rapid production of continental crust 1.7 to 1.9 b.y. ago; Nd isotopic evidence from the basement of the North American Midcontinent
(Nelson, Bruce K., *et al.*) 6: 746

igneous rocks—plutonic rocks
geochemistry: Isotopic studies of the late Archean plutonic rocks of the Wind River Range, Wyoming
(Stuckless, J. S., *et al.*) 7: 850
— Late Proterozoic and Devonian plutonic terrane within the Avalon Zone of Rhode Island
(Hermes, O. Don, *et al.*) 2: 272

igneous rocks—pyroclastics
ash-flow tuff: Correlation of ash-flow tuffs
(Hildreth, Wes, *et al.*) 7: 968
key beds: Quaternary volcanic stratigraphy of Managua, Nicaragua; correlation and source assignment for multiple overlapping plinian deposits
(Bice, David C.) 4: 533
pumice: Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940
textures: Proximal bedding deposits related to pyroclastic flows of May 18, 1980, Mount St. Helens, Washington
(Rowley, Peter D., *et al.*) 11: 1373
tuff: Geology and geochronology of the Tomochic Caldera, Chihuahua, Mexico
(Swanson, Eric R., *et al.*) 12: 1477

igneous rocks—ultramafics
ophiolite: Ophiolitic source rocks for Taconic-age flysch; trace-element evidence; discussion and reply
(Shanmugam, G., *et al.*) 9: 1221
— The Annieopsquotch ophiolite belt of Southwest Newfoundland; geology and tectonic significance
(Dunning, G. R., *et al.*) 11: 1466
— The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050

igneous rocks—volcanic rocks
distribution: Implications of the northwestwardly younger age of the volcanic rocks of west-central California
(Fox, Kenneth F., Jr., *et al.*) 5: 647
geochemistry: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83
petrology: Petrology and geochemistry of the Paliza Canyon Formation and the Bearhead Rhyolite, Keres Group, Jemez Mountains, New Mexico
(Guilbeau, Kevin P., *et al.*) 1: 108
— The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296

Indian Ocean—stratigraphy
Holocene: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part I, Evidence from Recent to late Holocene foraminiferal assemblages
(Williams, Douglas F., *et al.*) 2: 176
Pleistocene: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190

intrusions *see also* igneous rocks; metamorphism

intrusions—age
absolute age: Isotopic studies of the late Archean plutonic rocks of the Wind River Range, Wyoming
(Stuckless, J. S., *et al.*) 7: 850

intrusions—batholiths
age: Carboniferous U-Pb age of the Sebago Batholith, southwestern Maine; metamorphic and tectonic implications
(Aleinikoff, John N., *et al.*) 8: 990

intrusions—dikes
dike swarms: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364
emplacement: Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada
(Spencer, Jon E.) 9: 1140
ring dikes: High-potassium intrusive rocks of the Crandall ring-dike complex, Absaroka Mountains, Wyoming
(Kudo, A. M., *et al.*) 4: 522

intrusions—plutons
distribution: Geophysical evidence for an allochthonous Alleghanian(?) granitoid beneath the basement surface of the coastal plain near Lumberton, North Carolina
(Pratt, T. L., *et al.*) 8: 1070
emplacement: Emplacement of the zoned Zaer Pluton, Morocco
(Mahmood, Ahmed) 7: 931
— Late Proterozoic and Devonian plutonic terrane within the Avalon Zone of Rhode Island
(Hermes, O. Don, *et al.*) 2: 272
— Petrologic evidence for Jurassic, island-arc-like basement rocks in the southwestern Transverse Ranges and California continental borderland
(Sorensen, Sorena) 8: 997

intrusions—sills
augen gneiss: Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

invertebrates *see also* brachiopods; conodonts; foraminifers; graptolites; mollusks; radiolarians; trilobites

Ireland—oceanography
continental slope: The Goban Spur transect; geologic evolution of a sediment-starved passive continental margin
(de Graciansky, Pierre Charles, *et al.*) 1: 58

iron formations *see under* chemically precipitated rocks *under* sedimentary rocks

iron ores *see also under* economic geology *under* Great Lakes region

isostasy *see also* neotectonics

isotope dating *see* absolute age

isotopes *see also* absolute age; geochronology

isotopes—foraminifers
stable isotopes: Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495

isotopes—lead
ratios: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676

isotopes—neodymium
Nd-144/Nd-143: Rapid production of continental crust 1.7 to 1.9 b.y. ago; Nd isotopic evidence from the basement of the North American Mid-continent
(Nelson, Bruce K., *et al.*) 6: 746

isotopes—oxygen
O-18/O-16: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156
— Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114
— Uranium-series dating of fossil corals from marine sediments of southeastern United States Atlantic Coastal Plain
(Szabo, Barney J.) 3: 398

isotopes—sedimentary rocks
carbonate rocks: Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover; discussion and reply
(Gray, Jane, *et al.*) 12: 1594
sandstone: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770

isotopes—strontium
Sr-87/Sr-86: Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

Italy—structural geology
tectonics: Large-scale, thin-skinned thrusting in the southern Alps; kinematic models
(Laubscher, H. P.) 6: 710
— Topographic lineament swarms; clues to their origin from domain analysis of Italy
(Wise, Donald U., *et al.*) 7: 952

joints *see under* style *under* fractures

Jurassic *see also under* stratigraphy *under* Venezuela

Jurassic—geochronology
time scales: A Cretaceous and Jurassic geochronology
(Kent, Dennis V., *et al.*) 11: 1419

Kentucky—stratigraphy
Devonian: Defining the nature and location of a Late Devonian-Early Mississippian pycnocline in eastern Kentucky
(Ettensohn, Frank R., *et al.*) 10: 1313
Mississippian: Defining the nature and location of a Late Devonian-Early Mississippian pycnocline in eastern Kentucky
(Ettensohn, Frank R., *et al.*) 10: 1313

Kenya—geochronology
Pleistocene: K-Ar and $^{40}Ar/^{39}Ar$ dating of the hominid-bearing Pliocene-Pleistocene sequence at Koobi Fora, Lake Turkana, northern Kenya
(McDougall, Ian) 2: 159
Pliocene: K-Ar and $^{40}Ar/^{39}Ar$ dating of the hominid-bearing Pliocene-Pleistocene sequence at Koobi Fora, Lake Turkana, northern Kenya
(McDougall, Ian) 2: 159

land use *see also* reclamation

land use—effects
ground water: Simulation of changes in ground-water levels associated with strip mining
(Schwartz, Franklin W., *et al.*) 2: 253

landform evolution *see under* geomorphology

landslides *see under* slope stability

lava *see also* igneous rocks; magmas

lava—geochemistry
trace elements: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83
— Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676
— Petrology and geochemistry of the Paliza Canyon Formation and the Bearhead Rhyolite, Keres Group, Jemez Mountains, New Mexico
(Guilbeau, Kevin P., *et al.*) 1: 108
— The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296

lava—observations
lava flows: Late Cenozoic landscape evolution on lava flow surfaces of the Cima volcanic field, Mojave Desert, California
(Wells, Stephen G., *et al.*) 12: 1518

lead—isotopes
ratios: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676

lineation *see also* structural analysis

Louisiana—geomorphology
fluvial features: Morphology of a delta prograding by bulk sediment transport
(Kenyon, P. M., *et al.*) 11: 1457

magmas *see also* igneous rocks; intrusions; lava

magmas—contamination
crust: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676
— Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

magmas—differentiation
fractional crystallization: Differentiation of Mesozoic basalts of the Hartford Basin, Connecticut
(Philpotts, Anthony R., *et al.*) 9: 1131
— High-potassium intrusive rocks of the Crandall ring-dike complex, Absaroka Mountains, Wyoming
(Kudo, A. M., *et al.*) 4: 522

magmas—genesis
partial melting: Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940
processes: The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296
rifting: Geochemistry and origin of early Proterozoic supracrustal rocks, Dos Cabezas Mountains, southeastern Arizona
(Condie, Kent C., *et al.*) 5: 655

magmas—geochemistry
trace elements: Petrology and geochemistry of the Paliza Canyon Formation and the Bearhead Rhyolite, Keres Group, Jemez Mountains, New Mexico
(Guilbeau, Kevin P., *et al.*) 1: 108

magnetism of rocks and minerals *see* paleomagnetism

Maine—geochronology
Carboniferous: Carboniferous U-Pb age of the Sebago Batholith, southwestern Maine; metamorphic and tectonic implications
(Aleinikoff, John N., *et al.*) 8: 990

Maine—geomorphology
glacial geology: Esker characteristics in terms of glacier physics, Katahdin esker system, Maine
(Shreve, Ronald L.) 5: 639

maps *see also under* structural geology *under* USSR

marine sediments *see under* sediments

Maryland—sedimentary petrology
weathering: Saprolite formation beneath coastal plain sediments near Washington, D.C.
(Pavich, M. J., *et al.*) 7: 886

mass movements *see under* geomorphology

Massachusetts—geochemistry
trace elements: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammoncosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493

Massachusetts—structural geology
tectonics: Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227

meanders *see under* fluvial features *under* geomorphology

Mediterranean region *see also* the individual countries

Melanesia *see also* Fiji

melange *see under* interpretation *under* structural analysis

Mesozoic *see also* Cretaceous; Jurassic; *see also under* stratigraphy *under* California; New Jersey; New York; Pennsylvania

Mesozoic—geochronology
time scales: A Cretaceous and Jurassic geochronology
(Kent, Dennis V., *et al.*) 11: 1419

metals—geochemistry
marine sediments: Sediment-sea-water interaction at 200 and 300°C, 500 bars pressure; the role of sediment composition in diagenesis and low-grade metamorphism of marine clay
(Thornton, Edward C., *et al.*) 10: 1287

metamorphic rocks *see also* igneous rocks; metamorphism

metamorphic rocks—facies
amphibolite facies: Tectonics of the Seiad Massif, northern Klamath Mountains, California
(Cannat, M.) 1: 15
granulite facies: A Proterozoic granulite-facies terrane on Roan Mountain, western Blue Ridge Belt, North Carolina-Tennessee
(Gulley, Gerald L., Jr.) 11: 1428
— Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588

metamorphic rocks—genesis
complexes: The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101

metamorphic rocks—geochemistry
trace elements: Petrologic evidence for Jurassic, island-arc-like basement rocks in the southwestern Transverse Ranges and California continental borderland
(Sorensen, Sorena) 8: 997

metamorphic rocks—gneisses
augen gneiss: Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

metamorphic rocks—lithostratigraphy
Mesozoic: Stratigraphic and sedimentologic evidence of a submarine island-arc volcano in the lower Mesozoic Penon Blanco and Jasper Point formations, Mariposa County, California
(Bogen, Nicholas L.) 10: 1322
Proterozoic: Revised interpretation of the age of allochthonous rocks of the Uncompahgre Formation, Needle Mountains, Colorado
(Tewksbury, B. J.) 2: 224

metamorphic rocks—metaigneous rocks
geochemistry: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493
ophiolite: The ophiolitic Ingalls Complex, north-central Cascade Mountains, Washington
(Miller, Robert B.) 1: 27

metamorphic rocks—metasedimentary rocks
metalimestone: Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737
metapelite: Metamorphism of pelitic rocks in the Snow Peak area, northern Idaho; sequence of events and regional implications
(Lang, Helen M., *et al.*) 6: 731
metasandstone: The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona
(Harding, Lucy E., *et al.*) 6: 755
Paleosols: Keweenawan-age caliche Paleosol in the lower part of the Calument and Hecla Conglomerate, Centennial Mine, Calumet, Michigan
(Kalliokoski, J., *et al.*) 9: 1188

metamorphic rocks—metavolcanic rocks
genesis: Geochemistry and origin of early Proterozoic supracrustal rocks, Dos Cabezas Mountains, southeastern Arizona
(Condie, Kent C., *et al.*) 5: 655

metamorphic rocks—mineral assemblages
interpretation: $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England
(Sutter, John F., *et al.*) 1: 123
phase equilibria: Pre-Andean orogenesis in the Coast Ranges of central Chile
(Kato, Terence T.) 7: 918

metamorphism *see also* metamorphic rocks

metamorphism—age
absolute age: Carboniferous U-Pb age of the Sebago Batholith, southwestern Maine; metamorphic and tectonic implications
(Aleinikoff, John N., *et al.*) 8: 990

metamorphism—evolution
facies: Two early Proterozoic successions in central Wisconsin and their tectonic significance; alternative interpretation and reply
(Maass, R. S., *et al.*) 10: 1340

metamorphism—grade
low-grade metamorphism: Petrologic evidence for Jurassic, island-arc-like basement rocks in the southwestern Transverse Ranges and California continental borderland
(Sorensen, Sorena) 8: 997
— Sediment-sea-water interaction at 200 and 300°C, 500 bars pressure; the role of sediment composition in diagenesis and low-grade metamorphism of marine clay
(Thornton, Edward C., *et al.*) 10: 1287

metamorphism—P-T conditions
granulite facies: A Proterozoic granulite-facies terrane on Roan Mountain, western Blue Ridge Belt, North Carolina-Tennessee
(Gulley, Gerald L., Jr.) 11: 1428

metamorphism—polymetamorphism
age: $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England
(Sutter, John F., *et al.*) 1: 123
P-T conditions: Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588

metamorphism—prograde metamorphism
P-T conditions: Structure, petrology, and metamorphic history of the Nome Group blueschist terrane, Salmon Lake area, Seward Peninsula, Alaska
(Thurston, Stephen Pollock) 5: 600

metamorphism—regional metamorphism
evolution: Metamorphism of pelitic rocks in the Snow Peak area, northern Idaho; sequence of events and regional implications
(Lang, Helen M., *et al.*) 6: 731
high-grade metamorphism: Tectonics of the Seiad Massif, northern Klamath Mountains, California
(Cannat, M.) 1: 15

metamorphism—retrograde metamorphism
greenschist facies: Pre-Andean orogenesis in the Coast Ranges of central Chile
(Kato, Terence T.) 7: 918

metamorphism—thermal metamorphism
absolute age: Alleghanian deformation and metamorphism in the eastern North Carolina Piedmont
(Russell, Gail S., *et al.*) 3: 381

metasomatic rocks *see also* igneous rocks; metamorphic rocks; metamorphism

metasomatism *see also* metamorphism

Mexico *see also* Gulf Coastal Plain

Mexico—geochronology
Oligocene: Geology and geochronology of the Tomochic Caldera, Chihuahua, Mexico
(Swanson, Eric R., *et al.*) 12: 1477

Mexico—stratigraphy
Cretaceous: Mesozoic paleomagnetism and northward translation of the Baja California peninsula
(Hagstrum, Jonathan Tryon, *et al.*) 8: 1077

Michigan—stratigraphy
Pleistocene: Correlation of late Wisconsin glacial phases in the western Great Lakes area
(Attig, John W., *et al.*) 12: 1585
Proterozoic: Keweenawan-age caliche Paleosol in the lower part of the Calument and Hecla Conglomerate, Centennial Mine, Calumet, Michigan
(Kalliokoski, J., *et al.*) 9: 1188

Michigan—structural geology
structural analysis: Florence-Niagara Terrane; an early Proterozoic accretionary complex, Lake Superior region, U.S.A.
(Larue, D. K., *et al.*) 9: 1179

Middle East *see also* Turkey

Midwest *see also* Michigan; Minnesota; Ohio; South Dakota; Wisconsin

mineral deposits, genesis—iron ores
controls: Sedimentological constraints on the origins of Precambrian iron-formations
(Simonson, Bruce M.) 2: 244

mineral deposits, genesis—manganese ores
sedimentary processes: Geology and genesis of manganese oolite, Chiatura, Georgia, U.S.S.R.
(Bolton, Barrie R., *et al.*) 11: 1398

mineral deposits, genesis—uranium ores
geochemical controls: Paleomagnetic and petrologic evidence bearing on the age and origin of uranium deposits in the Permian Cutler Formation, Lisbon Valley, Utah
(Reynolds, Richard L., *et al.*) 6: 719

mineral resources *see also* the individual deposits

minerals—organic compounds
amber: Eocene amber from the Pacific Coast of North America
(Mustoe, George E.) 12: 1530

Minnesota—engineering geology
reservoirs: Bank-erosion processes in a cool-temperate environment, Orwell Lake, Minnesota
(Reid, John R., Jr.) 6: 781
shorelines: Bank-erosion processes in a cool-temperate environment, Orwell Lake, Minnesota
(Reid, John R., Jr.) 6: 781

Minnesota—stratigraphy
Pleistocene: Correlation of late Wisconsin glacial phases in the western Great Lakes area
(Attig, John W., *et al.*) 12: 1585

Miocene *see also under* geochronology *under* California; Nevada; *see also under* stratigraphy *under* California

miospores *see under* palynomorphs

Mississippian *see also under* stratigraphy *under* Kentucky

mollusks—ammonoids
Jurassic: The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050
Mesozoic: A Cretaceous and Jurassic geochronology
(Kent, Dennis V., *et al.*) 11: 1419

Montana—geomorphology
erosion features: Topographic inversion of badland buttes in Montana
(Donahue, John J.) 7: 911

Morocco—petrology
intrusions: Emplacement of the zoned Zaer Pluton, Morocco
(Mahmood, Ahmed) 7: 931

mud volcanoes *see also* volcanology

nannofossils *see under* algal flora

nappes *see under* orientation *under* folds

neodymium—isotopes
Nd-144/Nd-143: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770
— Rapid production of continental crust 1.7 to 1.9 b.y. ago; Nd isotopic evidence from the basement of the North American Mid-continent
(Nelson, Bruce K., *et al.*) 6: 746

Neogene—geochronology
time scales: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407

neotectonics *see also under* structural geology *under* Arizona; Basin and Range Province; California; Nevada; Pakistan

neotectonics—effects
geomorphologic effects: Response of alluvial rivers to slow active tectonic movement
(Ouchi, Shunji) 4: 504

Nevada—engineering geology
dams: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347

Nevada—geochronology
Miocene: Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada
(Spencer, Jon E.) 9: 1140

Nevada—sedimentary petrology
sedimentary rocks: Provenance of the Silurian Elder Sandstone, north-central Nevada
(Girty, Gary H., *et al.*) 7: 925

Nevada—structural geology
neotectonics: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347
structural analysis: Structure of the Havallah Sequence, Golconda Allochthon, Nevada; evidence for prolonged evolution in an accretionary prism
(Brueckner, Hannes K., *et al.*) 9: 1113

New England—geochemistry
trace elements: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493

New England—geochronology
Ordovician: $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England
(Sutter, John F., *et al.*) 1: 123

New England—structural geology
bibliography: Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227
tectonics: Carboniferous U-Pb age of the Sebago Batholith, southwestern Maine; metamorphic and tectonic implications
(Aleinikoff, John N., *et al.*) 8: 990
— Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227
— $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England
(Sutter, John F., *et al.*) 1: 123

New Hampshire—geochemistry
trace elements: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493

New Jersey—oceanography
continental shelf: New York Bight Fault
(Hutchinson, D. R., *et al.*) 8: 975

New Jersey—stratigraphy
Mesozoic: Paleomagnetism and oxide mineralogy of Upper Triassic to Lower Jurassic red beds and basalts in the Newark Basin
(McIntosh, W. C., *et al.*) 4: 463

New Mexico—petrology
igneous rocks: Petrology and geochemistry of the Paliza Canyon Formation and the Bearhead Rhyolite, Keres Group, Jemez Mountains, New Mexico
(Guilbeau, Kevin P., *et al.*) 1: 108
— The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296

New Mexico—structural geology
tectonics: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

New York—geochronology
Pleistocene: Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlation; discussion and reply
(Gadd, Nelson R., *et al.*) 9: 1223

New York—oceanography
continental shelf: New York Bight Fault
(Hutchinson, D. R., *et al.*) 8: 975

New York—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567
— Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595
Mesozoic: Paleomagnetism and oxide mineralogy of Upper Triassic to Lower Jurassic red beds and basalts in the Newark Basin
(McIntosh, W. C., *et al.*) 4: 463
Pleistocene: Till stratigraphy in the St. Lawrence Valley near Malone, New York; revised glacial history and stratigraphic nomenclature; discussion and reply
(Dreimanis, Aleksis, *et al.*) 1: 155
Quaternary: A pollen study of a late Quaternary peat bog, south-central Adirondack Mountains, New York
(Overpeck, Jonathan T.) 1: 145

New York—structural geology
tectonics: Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227

New Zealand—stratigraphy
changes of level: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156

Newfoundland—structural geology
tectonics: The Annieopsquotch ophiolite belt of Southwest Newfoundland; geology and tectonic significance
(Dunning, G. R., *et al.*) 11: 1466

Nicaragua—geochronology
Quaternary: Quaternary volcanic stratigraphy of Managua, Nicaragua; correlation and source assignment for multiple overlapping plinian deposits
(Bice, David C.) 4: 533

North America *see also* Appalachians; Atlantic Coastal Plain; Canada; Great Lakes; Great Lakes region; Great Plains; Gulf Coastal Plain; Mexico; Rocky Mountains; United States

North America—mineralogy
organic compounds: Eocene amber from the Pacific Coast of North America
(Mustoe, George E.) 12: 1530

North America—sedimentary petrology
sedimentary rocks: Sedimentological constraints on the origins of Precambrian iron-formations
(Simonson, Bruce M.) 2: 244

North America—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567
— Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595
Ordovician: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; discussion and reply
(Harper, D. A. T., *et al.*) 12: 1597
Silurian: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384

North America—structural geology
structural analysis: Structural styles in Mesozoic and Cenozoic melanges in the Western Cordillera of North America
(Cowan, Darrel S.) 4: 451

North America—tectonophysics
crust: Rapid production of continental crust 1.7 to 1.9 b.y. ago; Nd isotopic evidence from the basement of the North American Midcontinent
(Nelson, Bruce K., *et al.*) 6: 746
plate tectonics: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83
— Mesozoic paleomagnetism and northward translation of the Baja California peninsula
(Hagstrum, Jonathan Tryon, *et al.*) 8: 1077

North Carolina—geophysical surveys
heat flow: Geophysical evidence for an allochthonous Alleghanian(?) granitoid beneath the basement surface of the coastal plain near Lumberton, North Carolina
(Pratt, T. L., *et al.*) 8: 1070
seismic surveys: Geophysical evidence for an allochthonous Alleghanian(?) granitoid beneath the basement surface of the coastal plain near Lumberton, North Carolina
(Pratt, T. L., *et al.*) 8: 1070

North Carolina—petrology
metamorphism: A Proterozoic granulite-facies terrane on Roan Mountain, western Blue Ridge Belt, North Carolina-Tennessee
(Gulley, Gerald L., Jr.) 11: 1428
— Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588

North Carolina—structural geology
tectonics: Alleghanian deformation and metamorphism in the eastern North Carolina Piedmont
(Russell, Gail S., *et al.*) 3: 381
— Stratigraphy and tectonics of the Virginia-North Carolina Blue Ridge; evolution of a late Proterozoic-early Paleozoic hinge zone
(Wehr, Frederick, *et al.*) 3: 285
— Tectonic evolution of the easternmost Piedmont, North Carolina
(Farrar, Stewart S.) 3: 362

Northern Hemisphere *see also* Africa; Arctic Ocean; Atlantic Ocean; Central America; Europe; North America; Pacific Ocean; USSR

Norway—hydrogeology
hydrology: Subglacial hydrology and sediment transport at Bondhusbreen, Southwest Norway
(Hooke, Roger LeB., *et al.*) 3: 388

Nova Scotia—oceanography
continental shelf: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83
continental slope: Late Pleistocene sedimentation on the continental slope and rise off western Nova Scotia
(Swift, Stephen A.) 7: 832
— Late Quaternary slumps and debris flows on the Scotian Slope
(Piper, David J. W., *et al.*) 12: 1508

ocean floors *see also under* oceanography *under* Atlantic Ocean; Pacific Ocean

Ohio—stratigraphy
Devonian: Correlation of the subsurface Lower and Middle Devonian of the Lake Erie region; alternative interpretation and reply
(Sparling, Dale R., *et al.*) 9: 1213

Oklahoma—sedimentary petrology
sedimentary rocks: Textures of Paleozoic chert and novaculite in the Ouachita Mountains of Arkansas and Oklahoma and their geological significance
(Keller, Walter D., *et al.*) 11: 1353

Oklahoma—structural geology
tectonics: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

Oligocene *see also under* geochronology *under* Gulf Coastal Plain; Mexico; Texas

Ontario—geochronology
Proterozoic: U-Pb ages from the Nipigon Plate and northern Lake Superior
(Davis, D. W., *et al.*) 12: 1572

Ontario—stratigraphy
Devonian: Correlation of the subsurface Lower and Middle Devonian of the Lake Erie region; alternative interpretation and reply
(Sparling, Dale R., *et al.*) 9: 1213

oolite *see also under* carbonate rocks *under* sedimentary rocks

ophiolite *see under* metaigneous rocks *under* metamorphic rocks; *see under* ultramafics *under* igneous rocks

Ordovician *see also under* geochronology *under* New England; *see also under* stratigraphy *under* Atlantic region; North America; Scandinavia; Wales

Oregon—geochronology
Eocene: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770

Oregon—geomorphology
shore features: Storm-controlled oblique dunes of the Oregon coast; discussion and reply
(Carson, Michael A., *et al.*) 3: 409

Oregon—petrology
igneous rocks: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676

Oregon—stratigraphy
Cretaceous: Stratigraphy and sedimentology of Upper Cretaceous rocks in coastal Southwest Oregon; evidence for wrench-fault tectonics in a postulated accretionary terrane
(Bourgeois, Joanne, *et al.*) 8: 1007

Oregon—structural geology
tectonics: Tectonic setting of the southern Cascade Range as interpreted from its magnetic and gravity fields
(Blakely, Richard J., *et al.*) 1: 43

organic compounds *see under* minerals

orogeny—absolute age
Allegheny Orogeny: Alleghanian deformation and metamorphism in the eastern North Carolina Piedmont
(Russell, Gail S., *et al.*) 3: 381
Avalonian Orogeny: Late Proterozoic and Devonian plutonic terrane within the Avalon Zone of Rhode Island
(Hermes, O. Don, *et al.*) 2: 272
Penokean Orogeny: The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101
Taconic Orogeny: $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England
(Sutter, John F., *et al.*) 1: 123

orogeny—evolution
Allegheny Orogeny: Tectonic evolution of the easternmost Piedmont, North Carolina
(Farrar, Stewart S.) 3: 362
Nevadan Orogeny: Structure and tectonics of the northern Sierra Nevada
(Day, Howard W., *et al.*) 4: 436

— Timing and structural expression of the Nevadan Orogeny, Sierra Nevada, California; discussions and reply
(Bhattacharyya, Tapas, *et al.*) 10: 1346
orogenic belts: Pre-Andean orogenesis in the Coast Ranges of central Chile
(Kato, Terence T.) 7: 918
Pan-African Orogeny: Pan-African microplate accretion of the Arabian Shield
(Stoeser, Douglas B., *et al.*) 7: 817
Penokean Orogeny: Two early Proterozoic successions in central Wisconsin and their tectonic significance; alternative interpretation and reply
(Maass, R. S., *et al.*) 10: 1340
Taconic Orogeny: Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588
— Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227

orogeny—mechanism
Appalachian Phase: Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian Orogen
(Lash, Gary G.) 9: 1167

oxygen—isotopes
O-18/O-16: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156
— Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737
— Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114
— Uranium-series dating of fossil corals from marine sediments of southeastern United States Atlantic Coastal Plain
(Szabo, Barney J.) 3: 398

P-T conditions *see under* granulites *under* phase equilibria; *see under* metamorphism; *see under* polymetamorphism *under* metamorphism; *see under* prograde metamorphism *under* metamorphism

Pacific Coast *see also* the individual states and provinces

Pacific Coast—mineralogy
organic compounds: Eocene amber from the Pacific Coast of North America
(Mustoe, George E.) 12: 1530

Pacific Ocean—geochronology
Quaternary: Tephrochronology of marine tephra adjacent to Central America
(Ledbetter, Michael T.) 1: 77

Pacific Ocean—geophysical surveys
acoustical surveys: Nontransform offsets of the Pacific-Cocos plate boundary and their traces on the rise flank
(Lonsdale, Peter) 3: 313
seismic surveys: Mechanisms of subduction accretion along the central Aleutian Trench
(McCarthy, Jill, *et al.*) 6: 691
— Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940

Pacific Ocean—oceanography
ocean floors: Nontransform offsets of the Pacific-Cocos plate boundary and their traces on the rise flank
(Lonsdale, Peter) 3: 313
— Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940

Pacific Ocean—tectonophysics
heat flow: Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940
plate tectonics: Nontransform offsets of the Pacific-Cocos plate boundary and their traces on the rise flank
(Lonsdale, Peter) 3: 313
sea-floor spreading: Nontransform offsets of the Pacific-Cocos plate boundary and their traces on the rise flank
(Lonsdale, Peter) 3: 313
— Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940

Pacific region *see also* the individual countries

Pakistan—geochronology
Cenozoic: The magnetostratigraphy, fission-track dating, and stratigraphic evolution of the Peshawar intermontane basin, northern Pakistan
(Burbank, Douglas W., *et al.*) 4: 539

Pakistan—structural geology
neotectonics: The magnetostratigraphy, fission-track dating, and stratigraphic evolution of the Peshawar intermontane basin, northern Pakistan
(Burbank, Douglas W., *et al.*) 4: 539

Paleocene *see also under* stratigraphy *under* Great Basin

paleoclimatology—Cenozoic
Atlantic Ocean: A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs
(Pinet, Paul R., *et al.*) 5: 618

paleoclimatology—Paleozoic
Atlantic region: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020

paleoclimatology—Pliocene
Atlantic Ocean: Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495

paleoclimatology—Proterozoic
California: Glacial and syntectonic sedimentation; the upper Proterozoic Kingston Peak Formation, southern Panamint Range, eastern California
(Miller, Julia M. G.) 12: 1537
Michigan: Keweenawan-age caliche Paleosol in the lower part of the Calument and Hecla Conglomerate, Centennial Mine, Calumet, Michigan
(Kalliokoski, J., *et al.*) 9: 1188

paleoclimatology—Quaternary
Alaska: Eolian deflation by ancient katabatic winds; a late Quaternary example from the North Alaska Range
(Thorson, Robert M., *et al.*) 6: 702
Indian Ocean: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part I, Evidence from Recent to late Holocene foraminiferal assemblages
(Williams, Douglas F., *et al.*) 2: 176
— Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190
New York: A pollen study of a late Quaternary peat bog, south-central Adirondack Mountains, New York
(Overpeck, Jonathan T.) 1: 145
Texas: Archaeological geology of the Lubbock Lake site, southern High Plains of Texas
(Holliday, Vance T.) 12: 1483
Washington: Late Quaternary vegetation near Battle Ground Lake, southern Puget Trough, Washington
(Barnosky, Cathy W.) 2: 263

paleoecology—foraminifers
Holocene: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part I, Evidence from Recent to late Holocene foraminiferal assemblages
(Williams, Douglas F., *et al.*) 2: 176
Pliocene: Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic; faunal and isotopic evidence
(Hodell, David A., *et al.*) 4: 495

paleoecology—palynomorphs
Quaternary: A pollen study of a late Quaternary peat bog, south-central Adirondack Mountains, New York
(Overpeck, Jonathan T.) 1: 145
— Late Quaternary vegetation near Battle Ground Lake, southern Puget Trough, Washington
(Barnosky, Cathy W.) 2: 263

paleoecology—Pleistocene
Indian Ocean: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190

paleoecology—Proterozoic
Arizona: Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover; discussion and reply
(Gray, Jane, *et al.*) 12: 1594

paleoecology—Quaternary
Texas: Archaeological geology of the Lubbock Lake site, southern High Plains of Texas
(Holliday, Vance T.) 12: 1483

paleoecology—Silurian
Northern Hemisphere: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384

Paleogene *see also under* **stratigraphy** *under* **Europe; Gulf Coastal Plain**

Paleogene—geochronology
time scales: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407

paleogeography—Cenozoic
Atlantic Ocean: A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs
(Pinet, Paul R., *et al.*) 5: 618

paleogeography—Cretaceous
Mexico: Mesozoic paleomagnetism and northward translation of the Baja California peninsula
(Hagstrum, Jonathan Tryon, *et al.*) 8: 1077

paleogeography—Jurassic
Venezuela: The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050
Virginia: Early Jurassic sedimentation of a rift-valley lake; Culpeper Basin, northern Virginia
(Hentz, Tucker F.) 1: 92

paleogeography—Mesozoic
California: Stratigraphic and sedimentologic evidence of a submarine island-arc volcano in the lower Mesozoic Penon Blanco and Jasper Point formations, Mariposa County, California
(Bogen, Nicholas L.) 10: 1322

paleogeography—Miocene
California: Depositional environments in the Monterey Formation, Cuyama Basin, California
(Lagoe, Martin B.) 10: 1296

paleogeography—Ordovician
Atlantic region: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; discussion and reply
(Harper, D. A. T., *et al.*) 12: 1597
— Geology and paleobiology of islands in the Ordovician Iapetus Ocean; review and implications; discussion and reply
(Gibbons, Wes, *et al.*) 9: 1225

paleogeography—Paleozoic
Atlantic region: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020

paleogeography—Pleistocene
Columbia Plateau: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271
New York: Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlation; discussion and reply
(Gadd, Nelson R., *et al.*) 9: 1223

paleogeography—Proterozoic
Africa: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663
Michigan: Keweenawan-age caliche Paleosol in the lower part of the Calument and Hecla Conglomerate, Centennial Mine, Calumet, Michigan
(Kalliokoski, J., *et al.*) 9: 1188

paleogeography—Silurian
Northern Hemisphere: Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384

paleomagnetism *see under* **geochronology**

paleomagnetism—applications
tephrochronology: Correlation of ash-flow tuffs
(Hildreth, Wes, *et al.*) 7: 968

paleomagnetism—Cenozoic
Atlantic Ocean: Numerical ages of Cenozoic biostratigraphic datum levels; results of South Atlantic Leg 73 drilling; discussion and reply
(Bukry, David, *et al.*) 6: 813
global: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407
Pakistan: The magnetostratigraphy, fission-track dating, and stratigraphic evolution of the Peshawar intermontane basin, northern Pakistan
(Burbank, Douglas W., *et al.*) 4: 539

paleomagnetism—Cretaceous
Mexico: Mesozoic paleomagnetism and northward translation of the Baja California peninsula
(Hagstrum, Jonathan Tryon, *et al.*) 8: 1077

paleomagnetism—Mesozoic
Eastern U.S.: Paleomagnetism and oxide mineralogy of Upper Triassic to Lower Jurassic red beds and basalts in the Newark Basin
(McIntosh, W. C., *et al.*) 4: 463
global: A Cretaceous and Jurassic geochronology
(Kent, Dennis V., *et al.*) 11: 1419

paleomagnetism—Paleozoic
Western U.S.: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

paleomagnetism—Permian
Utah: Paleomagnetic and petrologic evidence bearing on the age and origin of uranium deposits in the Permian Cutler Formation, Lisbon Valley, Utah
(Reynolds, Richard L., *et al.*) 6: 719

paleomagnetism—Pliocene
Fiji: Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529

paleomagnetism—Proterozoic
Africa: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663
Paleosols *see under* lithostratigraphy *under* sediments; *see under* metasedimentary rocks *under* metamorphic rocks
Paleozoic *see also under* geochronology *under* Appalachians; California; Colorado; *see also under* stratigraphy *under* Africa; Atlantic region; South America
paleozoogeography *see* biogeography
palynomorphs—dinoflagellates
Paleogene: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407
palynomorphs—miospores
Quaternary: A pollen study of a late Quaternary peat bog, south-central Adirondack Mountains, New York
(Overpeck, Jonathan T.) 1: 145
— Late Quaternary vegetation near Battle Ground Lake, southern Puget Trough, Washington
(Barnosky, Cathy W.) 2: 263
paragenesis—metamorphic rocks
Alaska: Structure, petrology, and metamorphic history of the Nome Group blueschist terrane, Salmon Lake area, Seward Peninsula, Alaska
(Thurston, Stephen Pollock) 5: 600
Pennsylvania—stratigraphy
Mesozoic: Paleomagnetism and oxide mineralogy of Upper Triassic to Lower Jurassic red beds and basalts in the Newark Basin
(McIntosh, W. C., *et al.*) 4: 463
Pennsylvania—structural geology
deformation: Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian Orogen
(Lash, Gary G.) 9: 1167
Permian *see also under* stratigraphy *under* Colorado Plateau
Phanerozoic *see also* Cenozoic; Cretaceous; Jurassic; Mesozoic; Neogene; Paleogene; Tertiary
phase equilibria—granulites
P-T conditions: Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588
phase equilibria—magmas
experimental studies: Differentiation of Mesozoic basalts of the Hartford Basin, Connecticut
(Philpotts, Anthony R., *et al.*) 9: 1131
phase equilibria—volcanic rocks
interpretation: The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296
physical geography *see* geomorphology
planetology *see also* Venus
Plantae *see also* algae; algal flora; palynomorphs
plate tectonics *see also under* tectonophysics *under* Alaska; Appalachians; Arabian Peninsula; California; Caribbean region; China; North America; Pacific Ocean; Red Sea region; Saudi Arabia; Turkey
Pleistocene *see also under* geochronology *under* Atlantic Coastal Plain; Australia; Great Lakes; Kenya; New York; *see also under* stratigraphy *under* Arctic Ocean; Columbia Plateau; Great Lakes region; Idaho; Indian Ocean; Michigan; Minnesota; New York; Washington; Wisconsin
Pliocene *see also under* geochronology *under* Kenya; *see also under* stratigraphy *under* Atlantic Ocean; Fiji
plutons *see under* intrusions
pollution *see also* reclamation
potassium—geochemistry
intrusive rocks: High-potassium intrusive rocks of the Crandall ring-dike complex, Absaroka Mountains, Wyoming
(Kudo, A. M., *et al.*) 4: 522
Proterozoic *see also under* geochronology *under* Canadian Shield; Great Lakes region; Ontario; Rhode Island; United States; Wisconsin; *see also under* stratigraphy *under* Africa; Appalachians; Arizona; Botswana; California; Colorado; Michigan; South Africa; Wisconsin; Zimbabwe
pumice *see also under* pyroclastics *under* igneous rocks
pyroclastics *see under* igneous rocks
Quaternary *see also under* geochronology *under* Europe; Nicaragua; Pacific Ocean; West Germany; *see also under* stratigraphy *under* Alaska; New York; Texas; Washington
Queensland—stratigraphy
changes of level: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156
racemization *see under* geochronology
radioactive dating *see* absolute age
radiocarbon dating *see* absolute age
radiolarians—biostratigraphy
Tertiary: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407
radiolarians—paleoecology
Pleistocene: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190
rare earths *see also* neodymium
rare earths—geochemistry
augen gneiss: Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411
basalts: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83
— Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676
metaigneous rocks: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493
metamorphic rocks: Petrologic evidence for Jurassic, island-arc-like basement rocks in the southwestern Transverse Ranges and California continental borderland
(Sorensen, Sorena) 8: 997
volcanic rocks: Petrology and geochemistry of the Paliza Canyon Formation and the Bearhead Rhyolite, Keres Group, Jemez Mountains, New Mexico
(Guilbeau, Kevin P., *et al.*) 1: 108
— The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296
reclamation *see also* land use
reclamation—environment
strip mining: Simulation of changes in ground-water levels associated with strip mining
(Schwartz, Franklin W., *et al.*) 2: 253
Red Sea region—tectonophysics
plate tectonics: Pan-African microplate accretion of the Arabian Shield
(Stoeser, Douglas B., *et al.*) 7: 817
regional geology *see* areal geology under the appropriate area term
remote sensing *see also under* geophysical surveys *under* USSR
reservoirs *see also under* engineering geology *under* Minnesota
Rhode Island—geochronology
Devonian: Late Proterozoic and Devonian plutonic terrane within the Avalon Zone of Rhode Island
(Hermes, O. Don, *et al.*) 2: 272
Proterozoic: Late Proterozoic and Devonian plutonic terrane within the Avalon Zone of Rhode Island
(Hermes, O. Don, *et al.*) 2: 272
Rhodesia *see* Zimbabwe
rift zones *see under* systems *under* faults
rivers *see under* fluvial features *under* geomorphology

rock mechanics *see also* soil mechanics

rock mechanics—frost action
fracturing: A theoretical model of the fracture of rock during freezing
(Walder, Joseph Scott, *et al.*) 3: 336

Rocky Mountains *see also* the individual states and provinces

Rocky Mountains—structural geology
tectonics: Major dextral transcurrent displacements along the northern Rocky Mountain Trench and related lineaments in north-central British Columbia
(Gabrielse, H.) 1: 1

Russia *see* USSR

Sahara *see also* the individual countries

sandstone *see also under* clastic rocks *under* sedimentary rocks

Saudi Arabia—tectonophysics
plate tectonics: Pan-African microplate accretion of the Arabian Shield
(Stoeser, Douglas B., *et al.*) 7: 817

Scandinavia—stratigraphy
Ordovician: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; discussion and reply
(Harper, D. A. T., *et al.*) 12: 1597

sea-floor spreading *see also* continental drift; *see also under* tectonophysics *under* Atlantic Ocean; Pacific Ocean

sedimentary rocks *see also* sedimentary structures; sedimentation; sediments

sedimentary rocks—carbonate rocks
geochemistry: Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover
(Beeunas, Mark A., *et al.*) 6: 737
— Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona; implications for the timing and development of a terrestrial plant cover; discussion and reply
(Gray, Jane, *et al.*) 12: 1594
oolite: Geology and genesis of manganese oolite, Chiatura, Georgia, U.S.S.R.
(Bolton, Barrie R., *et al.*) 11: 1398

sedimentary rocks—chemically precipitated rocks
iron formations: Sedimentological constraints on the origins of Precambrian iron-formations
(Simonson, Bruce M.) 2: 244

sedimentary rocks—clastic rocks
black shale: Defining the nature and location of a Late Devonian-Early Mississippian pycnocline in eastern Kentucky
(Ettensohn, Frank R., *et al.*) 10: 1313
— Rb-Sr dating of diagenesis and source age of clays in Upper Devonian black shales of Texas
(Morton, John P.) 8: 1043
flysch: Ophiolitic source rocks for Taconic-age flysch; trace-element evidence; discussion and reply
(Shanmugam, G., *et al.*) 9: 1221
lithofacies: Depositional environments in the Monterey Formation, Cuyama Basin, California
(Lagoe, Martin B.) 10: 1296
— Glacial and syntectonic sedimentation; the upper Proterozoic Kingston Peak Formation, southern Panamint Range, eastern California
(Miller, Julia M. G.) 12: 1537
provenance: Late Precambrian and early Paleozoic tectonism and associated sedimentation in northern Victoria Land, Antarctica
(Wright, Thomas O.) 10: 1332
— Stratigraphy and sedimentology of Upper Cretaceous rocks in coastal Southwest Oregon; evidence for wrench-fault tectonics in a postulated accretionary terrane
(Bourgeois, Joanne, *et al.*) 8: 1007
sandstone: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770
— Petrology and provenance of pre-Late Devonian sandstones, Shoo Fly Complex, northern Sierra Nevada, California
(Girty, Gary H., *et al.*) 4: 516
— Provenance of the Silurian Elder Sandstone, north-central Nevada
(Girty, Gary H., *et al.*) 7: 925
saprolite: Saprolite formation beneath coastal plain sediments near Washington, D.C.
(Pavich, M. J., *et al.*) 7: 886
shale: Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114

sedimentary rocks—environmental analysis
lacustrine environment: Early Jurassic sedimentation of a rift-valley lake; Culpeper Basin, northern Virginia
(Hentz, Tucker F.) 1: 92

sedimentary rocks—lithostratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567
— Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595

sedimentary rocks—textures
silicate rocks: Textures of Paleozoic chert and novaculite in the Ouachita Mountains of Arkansas and Oklahoma and their geological significance
(Keller, Walter D., *et al.*) 11: 1353

sedimentary structures *see also* sedimentary rocks; sediments

sedimentary structures—biogenic structures
stromatolites: Archean stromatolites from the Hartville Uplift, eastern Wyoming
(Hofmann, H. J., *et al.*) 7: 842

sedimentary structures—environmental analysis
lacustrine environment: Early Jurassic sedimentation of a rift-valley lake; Culpeper Basin, northern Virginia
(Hentz, Tucker F.) 1: 92
subtidal environment: Sedimentological constraints on the origins of Precambrian iron-formations
(Simonson, Bruce M.) 2: 244

sedimentary structures—planar bedding structures
rhythmic bedding: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271

sedimentary structures—soft sediment deformation
patterns: Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian Orogen
(Lash, Gary G.) 9: 1167

sedimentation—controls
tectonic controls: Late Precambrian and early Paleozoic tectonism and associated sedimentation in northern Victoria Land, Antarctica
(Wright, Thomas O.) 10: 1332
— Stratigraphy and sedimentology of Upper Cretaceous rocks in coastal Southwest Oregon; evidence for wrench-fault tectonics in a postulated accretionary terrane
(Bourgeois, Joanne, *et al.*) 8: 1007
— Stratigraphy and tectonics of the Virginia-North Carolina Blue Ridge; evolution of a late Proterozoic-early Paleozoic hinge zone
(Wehr, Frederick, *et al.*) 3: 285
— The Goban Spur transect; geologic evolution of a sediment-starved passive continental margin
(de Graciansky, Pierre Charles, *et al.*) 1: 58
— The magnetostratigraphy, fission-track dating, and stratigraphic evolution of the Peshawar intermontane basin, northern Pakistan
(Burbank, Douglas W., *et al.*) 4: 539

sedimentation—cyclic processes
lithofacies: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567
— Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595
marine sedimentation: Erosional modification of Bahama Escarpment
(Freeman-Lynde, R. P., *et al.*) 4: 481
— Geology and genesis of manganese oolite, Chiatura, Georgia, U.S.S.R.
(Bolton, Barrie R., *et al.*) 11: 1398

— Intercontinental correlation by sea-level events in the Early Silurian of North American and China (Yangtze Platform)
(Johnson, Markes E., *et al.*) 11: 1384

sedimentation—environment
anaerobic environment: Defining the nature and location of a Late Devonian-Early Mississippian pycnocline in eastern Kentucky
(Ettensohn, Frank R., *et al.*) 10: 1313
deep-sea environment: Depositional environments in the Monterey Formation, Cuyama Basin, California
(Lagoe, Martin B.) 10: 1296
glaciolacustrine environment: Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlation; discussion and reply
(Gadd, Nelson R., *et al.*) 9: 1223
subtidal environment: Sedimentological constraints on the origins of Precambrian iron-formations
(Simonson, Bruce M.) 2: 244

sedimentation—processes
deltaic sedimentation: Morphology of a delta prograding by bulk sediment transport
(Kenyon, P. M., *et al.*) 11: 1457
glaciolacustrine sedimentation: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271
glaciomarine sedimentation: Glacial and syntectonic sedimentation; the upper Proterozoic Kingston Peak Formation, southern Panamint Range, eastern California
(Miller, Julia M. G.) 12: 1537
— Late Pleistocene sedimentation on the continental slope and rise off western Nova Scotia
(Swift, Stephen A.) 7: 832
— Sediments of the Lomonosov Ridge and Makarov Basin; a Pleistocene stratigraphy for the North Pole
(Morris, Thomas H., *et al.*) 7: 901
lacustrine sedimentation: Early Jurassic sedimentation of a rift-valley lake; Culpeper Basin, northern Virginia
(Hentz, Tucker F.) 1: 92
marine sedimentation: A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs
(Pinet, Paul R., *et al.*) 5: 618
— Dissolution and water-mass patterns in the Southeast Indian Ocean; Part I, Evidence from Recent to late Holocene foraminiferal assemblages
(Williams, Douglas F., *et al.*) 2: 176
— Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190

sedimentation—provenance
flysch: Ophiolitic source rocks for Taconic-age flysch; trace-element evidence; discussion and reply
(Shanmugam, G., *et al.*) 9: 1221
paleocurrents: The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona
(Harding, Lucy E., *et al.*) 6: 755
sandstone: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770
— Petrology and provenance of pre-Late Devonian sandstones, Shoo Fly Complex, northern Sierra Nevada, California
(Girty, Gary H., *et al.*) 4: 516
— Provenance of the Silurian Elder Sandstone, north-central Nevada
(Girty, Gary H., *et al.*) 7: 925

sedimentation—sedimentation rates
marl: Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji
(Rodda, P., *et al.*) 4: 529

sedimentation—transport
stream transport: Bed microtopography and entrainment thresholds in gravel-bed rivers
(Brayshaw, Andrew C.) 2: 218
turbidity currents: Late Quaternary slumps and debris flows on the Scotian Slope
(Piper, David J. W., *et al.*) 12: 1508
— Stratigraphic and sedimentologic evidence of a submarine island-arc volcano in the lower Mesozoic Penon Blanco and Jasper Point formations, Mariposa County, California
(Bogen, Nicholas L.) 10: 1322
wind transport: Eolian deflation by ancient katabatic winds; a late Quaternary example from the North Alaska Range
(Thorson, Robert M., *et al.*) 6: 702

sediments *see also* sedimentary rocks; sedimentary structures; sedimentation

sediments—clastic sediments
rhythmite: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271
till: Till stratigraphy in the St. Lawrence Valley near Malone, New York; revised glacial history and stratigraphic nomenclature; discussion and reply
(Dreimanis, Aleksis, *et al.*) 1: 155

sediments—lithostratigraphy
Paleosols: Archaeological geology of the Lubbock Lake site, southern High Plains of Texas
(Holliday, Vance T.) 12: 1483

sediments—marine sediments
diagenesis: Sediment-sea-water interaction at 200 and 300°C, 500 bars pressure; the role of sediment composition in diagenesis and low-grade metamorphism of marine clay
(Thornton, Edward C., *et al.*) 10: 1287
distribution: Late Pleistocene sedimentation on the continental slope and rise off western Nova Scotia
(Swift, Stephen A.) 7: 832
environmental analysis: Dissolution and water-mass patterns in the Southeast Indian Ocean; Part I, Evidence from Recent to late Holocene foraminiferal assemblages
(Williams, Douglas F., *et al.*) 2: 176
— Dissolution and water-mass patterns in the Southeast Indian Ocean; Part II, The Pleistocene record from Brunhes to Matuyama age sediments
(Williams, Douglas F., *et al.*) 2: 190
lithofacies: Erosional modification of Bahama Escarpment
(Freeman-Lynde, R. P., *et al.*) 4: 481
lithostratigraphy: Sediments of the Lomonosov Ridge and Makarov Basin; a Pleistocene stratigraphy for the North Pole
(Morris, Thomas H., *et al.*) 7: 901
volcaniclastics: Tephrochronology of marine tephra adjacent to Central America
(Ledbetter, Michael T.) 1: 77

seismic surveys *see under* geophysical surveys *under* Atlantic Ocean; North Carolina; Pacific Ocean

seismology *see also* earthquakes

seismology—earthquakes
prediction: Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas Fault, Cajon Pass, Southern California
(Weldon, Ray J., II, *et al.*) 6: 793
seismicity: Seismicity, seismic reflection studies, gravity and geology of the central Virginia seismic zone; Part I, Seismicity
(Bollinger, G. A., *et al.*) 1: 49

shale *see under* clastic rocks *under* sedimentary rocks

shore features *see under* geomorphology

shorelines *see also under* engineering geology *under* Minnesota

sills *see under* intrusions

Silurian *see also under* stratigraphy *under* China; North America

slope stability *see also* geomorphology; *see also under* engineering geology *under* Atlantic Ocean; Washington

slope stability—landslides
causes: Landslides caused by earthquakes; discussion and reply
(Youd, T. Leslie, *et al.*) 8: 1091

soil mechanics *see also* rock mechanics

soil mechanics—liquefaction
earthquakes: Landslides caused by earthquakes; discussion and reply
(Youd, T. Leslie, *et al.*) 8: 1091

soil mechanics—materials, properties
saprolite: Saprolite formation beneath coastal plain sediments near Washington, D.C.
(Pavich, M. J., *et al.*) 7: 886

soils—surveys
California: Late Cenozoic landscape evolution on lava flow surfaces of the Cima volcanic field, Mojave Desert, California
(Wells, Stephen G., *et al.*) 12: 1518

South Africa—stratigraphy
Proterozoic: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663

South America *see also* Andes; Chile; Venezuela

South America—stratigraphy
Paleozoic: Migration of glacial centers across Gondwana during Paleozoic Era
(Caputo, Mario V., *et al.*) 8: 1020

South Dakota—hydrogeology
ground water: Process and rate of dedolomitization; mass transfer and ^{14}C dating in a regional carbonate aquifer; extended interpretation and reply
(Konikow, Leonard F., *et al.*) 8: 1096

Southern Hemisphere *see also* Africa; Antarctica; Atlantic Ocean; Indian Ocean; Pacific Ocean; South America

Southern U.S. *see also* Arkansas; Kentucky; Louisiana; Tennessee

Southwestern U.S. *see also* Arizona; New Mexico; Oklahoma; Texas

Southwestern U.S.—structural geology
tectonics: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

Soviet Union *see* USSR

springs *see also* ground water

stromatolites *see under* algae

strontium—isotopes
Sr-87/Sr-86: Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range
(Heller, Paul L., *et al.*) 6: 770
— Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska
(Dusel-Bacon, Cynthia, *et al.*) 4: 411

structural analysis *see also* folds

structural analysis—faults
orientation: Neogene paleostress changes in the Basin and Range; a case study at Hoover Dam, Nevada-Arizona
(Angelier, Jacques, *et al.*) 3: 347

structural analysis—folds
fold axes: Florence-Niagara Terrane; an early Proterozoic accretionary complex, Lake Superior region, U.S.A.
(Larue, D. K., *et al.*) 9: 1179
polyphase processes: The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101

structural analysis—interpretation
allochthons: Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian Orogen
(Lash, Gary G.) 9: 1167
— Structure of the Havallah Sequence, Golconda Allochthon, Nevada; evidence for prolonged evolution in an accretionary prism
(Brueckner, Hannes K., *et al.*) 9: 1113

blueschist: Structure, petrology, and metamorphic history of the Nome Group blueschist terrane, Salmon Lake area, Seward Peninsula, Alaska
(Thurston, Stephen Pollock) 5: 600
complexes: Structure and deformation history of the Bitlis suture near Lake Hazar, southeastern Turkey
(Hempton, Mark R.) 2: 233
— Tectonics of the Seiad Massif, northern Klamath Mountains, California
(Cannat, M.) 1: 15
granulites: Granulites at Winding Stair Gap, North Carolina; the thermal axis of Paleozoic metamorphism in the Southern Appalachians
(Absher, B. Steven, *et al.*) 5: 588
melange: Structural styles in Mesozoic and Cenozoic melanges in the Western Cordillera of North America
(Cowan, Darrel S.) 4: 451
— Tectonic relationships between forearc-basin strata and the accretionary complex at Bath, Barbados
(Torrini, Rudolph, Jr., *et al.*) 7: 861
metamorphic rocks: Timing and structural expression of the Nevadan Orogeny, Sierra Nevada, California; discussions and reply
(Bhattacharyya, Tapas, *et al.*) 10: 1346
polyphase processes: Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, Southern Appalachian foreland; a field test of theory
(Wiltschko, David V., *et al.*) 4: 426
— Structure and tectonics of the northern Sierra Nevada
(Day, Howard W., *et al.*) 4: 436

structural petrology *see* structural analysis

Switzerland—geomorphology
fluvial features: Morphology of a delta prograding by bulk sediment transport
(Kenyon, P. M., *et al.*) 11: 1457

tectonics *see also* faults; folds; neotectonics; orogeny; structural analysis; *see also under* structural geology *under* Alaska; Alps; Antarctica; Appalachians; Barbados; Basin and Range Province; British Columbia; California; Colorado; Connecticut; Italy; Massachusetts; New England; New Mexico; New York; Newfoundland; North Carolina; Oklahoma; Oregon; Rocky Mountains; Southwestern U.S.; Turkey; USSR; Utah; Vermont; Virginia; Western U.S.; Wisconsin; Wyoming

Tennessee—petrology
metamorphism: A Proterozoic granulite-facies terrane on Roan Mountain, western Blue Ridge Belt, North Carolina-Tennessee
(Gulley, Gerald L., Jr.) 11: 1428

Tennessee—structural geology
deformation: Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, Southern Appalachian foreland; a field test of theory
(Wiltschko, David V., *et al.*) 4: 426

tephrochronology *see under* geochronology

Tertiary *see also* Neogene; Paleogene

Tertiary—geochronology
time scales: Cenozoic geochronology
(Berggren, William A., *et al.*) 11: 1407

Texas—geochronology
absolute age: Rb-Sr dating of diagenesis and source age of clays in Upper Devonian black shales of Texas
(Morton, John P.) 8: 1043
Oligocene: Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast
(Morton, John P.) 1: 114

Texas—stratigraphy
Quaternary: Archaeological geology of the Lubbock Lake site, southern High Plains of Texas
(Holliday, Vance T.) 12: 1483

theoretical studies *see under* connate waters *under* ground water; *see under* fractures

thrust faults *see under* displacements *under* faults

time scales *see under* geochronology

trace elements *see under* geochemistry *under* Alaska; Appalachians; California; diagenesis; igneous rocks; lava; magmas; Massachusetts; metamorphic rocks; New England; New Hampshire; Vermont; Wyoming
trilobites—biogeography
Ordovician: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; review and implications; discussion and reply
(Gibbons, Wes, *et al.*) 9: 1225
turbidity currents *see under* transport *under* sedimentation
Turkey—structural geology
tectonics: Structure and deformation history of the Bitlis suture near Lake Hazar, southeastern Turkey
(Hempton, Mark R.) 2: 233
Turkey—tectonophysics
plate tectonics: Structure and deformation history of the Bitlis suture near Lake Hazar, southeastern Turkey
(Hempton, Mark R.) 2: 233
underground water *see* ground water
United Kingdom *see also* Wales
United States *see also* Alaska; Arizona; Arkansas; California; Colorado; Connecticut; District of Columbia; Idaho; Kentucky; Louisiana; Maine; Maryland; Massachusetts; Michigan; Minnesota; Montana; Nevada; New England; New Hampshire; New Jersey; New Mexico; New York; North Carolina; Ohio; Oklahoma; Oregon; Pacific Coast; Pennsylvania; Rhode Island; South Dakota; Southwestern U.S.; Tennessee; Texas; Utah; Vermont; Virginia; Washington; West Virginia; Western U.S.; Wisconsin; Wyoming
United States—geochronology
Proterozoic: Rapid production of continental crust 1.7 to 1.9 b.y. ago; Nd isotopic evidence from the basement of the North American Midcontinent
(Nelson, Bruce K., *et al.*) 6: 746
uranium ores *see also under* economic geology *under* Utah
USSR—economic geology
manganese ores: Geology and genesis of manganese oolite, Chiatura, Georgia, U.S.S.R.
(Bolton, Barrie R., *et al.*) 11: 1398
USSR—geophysical surveys
remote sensing: Structure of the Vakhsh fold-and-thrust belt, Tadjik SSR; geologic mapping on a Landsat image base
(Leith, William, *et al.*) 7: 875
USSR—structural geology
maps: Structure of the Vakhsh fold-and-thrust belt, Tadjik SSR; geologic mapping on a Landsat image base
(Leith, William, *et al.*) 7: 875
tectonics: Structure of the Vakhsh fold-and-thrust belt, Tadjik SSR; geologic mapping on a Landsat image base
(Leith, William, *et al.*) 7: 875
Utah—economic geology
uranium ores: Paleomagnetic and petrologic evidence bearing on the age and origin of uranium deposits in the Permian Cutler Formation, Lisbon Valley, Utah
(Reynolds, Richard L., *et al.*) 6: 719
Utah—structural geology
tectonics: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364
Venezuela—stratigraphy
Jurassic: The Siquisique ophiolites, northern Lara State, Venezuela; a discussion on their Middle Jurassic ammonites and tectonic implications
(Bartok, P. E., *et al.*) 8: 1050
Venus—observations
landing sites: The surface of Venus as revealed by the Venera landings; Part II
(Basilevsky, A. T., *et al.*) 1: 137
Vermont—geochemistry
trace elements: Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts
(Leo, Gerhard W.) 12: 1493
Vermont—structural geology
tectonics: Tectonic synthesis of the Taconian Orogeny in western New England
(Stanley, Rolfe S., *et al.*) 10: 1227
Victoria—stratigraphy
changes of level: Correlation of East Australian Pleistocene shorelines with deep-sea core stages; a basis for a coastal chronology
(Ward, W. T.) 9: 1156
Virginia—geophysical surveys
gravity surveys: Seismicity, seismic reflection, gravity, and geology of the central Virginia seismic zone; Part 3, Gravity
(Keller, M. R., *et al.*) 12: 1580
Virginia—sedimentary petrology
sedimentation: Early Jurassic sedimentation of a rift-valley lake; Culpeper Basin, northern Virginia
(Hentz, Tucker F.) 1: 92
weathering: Saprolite formation beneath coastal plain sediments near Washington, D.C.
(Pavich, M. J., *et al.*) 7: 886
Virginia—seismology
earthquakes: Seismicity, seismic reflection studies, gravity and geology of the central Virginia seismic zone; Part I, Seismicity
(Bollinger, G. A., *et al.*) 1: 49
Virginia—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595
Virginia—structural geology
tectonics: Stratigraphy and tectonics of the Virginia-North Carolina Blue Ridge; evolution of a late Proterozoic-early Paleozoic hinge zone
(Wehr, Frederick, *et al.*) 3: 285
volcanic rocks *see under* igneous rocks
volcanism *see under* volcanology
volcanoes *see under* volcanology
volcanology—volcanism
evolution: The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico
(Nielsen, Roger L., *et al.*) 3: 296
explosive eruptions: Tephrochronology of marine tephra adjacent to Central America
(Ledbetter, Michael T.) 1: 77
island arcs: Stratigraphic and sedimentologic evidence of a submarine island-arc volcano in the lower Mesozoic Penon Blanco and Jasper Point formations, Mariposa County, California
(Bogen, Nicholas L.) 10: 1322
migration: Implications of the northwestwardly younger age of the volcanic rocks of west-central California
(Fox, Kenneth F., Jr., *et al.*) 5: 647
periodicity: Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics
(Jansa, L. F., *et al.*) 1: 83
— Geology and geochronology of the Tomochic Caldera, Chihuahua, Mexico
(Swanson, Eric R., *et al.*) 12: 1477
rifting: Geochemistry and origin of early Proterozoic supracrustal rocks, Dos Cabezas Mountains, southeastern Arizona
(Condie, Kent C., *et al.*) 5: 655
spreading centers: Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin
(Lonsdale, Peter, *et al.*) 7: 940
tephrochronology: Correlation of ash-flow tuffs
(Hildreth, Wes, *et al.*) 7: 968
volcanology—volcanoes
Laacher See Volcano: Laacher See Tephra; a widespread isochronous late Quaternary tephra layer in Central and Northern Europe
(van den Bogaard, Paul, *et al.*) 12: 1554
Mount Saint Helens: Initiation and flow behavior of the 1980 Pine Creek and Muddy River lahars, Mount St. Helens, Washington
(Pierson, Thomas C.) 8: 1056
— Proximal bedding deposits related to pyroclastic flows of May 18, 1980, Mount St. Helens, Washington
(Rowley, Peter D., *et al.*) 11: 1373

Nicaragua: Quaternary volcanic stratigraphy of Managua, Nicaragua; correlation and source assignment for multiple overlapping plinian deposits
(Bice, David C.) 4: 533

Wales—stratigraphy
Ordovician: Geology and paleobiology of islands in the Ordovician Iapetus Ocean; review and implications; discussion and reply
(Gibbons, Wes, *et al.*) 9: 1225

Washington—engineering geology
slope stability: Initiation and flow behavior of the 1980 Pine Creek and Muddy River lahars, Mount St. Helens, Washington
(Pierson, Thomas C.) 8: 1056

Washington—mineralogy
organic compounds: Eocene amber from the Pacific Coast of North America
(Mustoe, George E.) 12: 1530

Washington—petrology
igneous rocks: Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho
(Church, Stanley E.) 5: 676
metamorphic rocks: The ophiolitic Ingalls Complex, north-central Cascade Mountains, Washington
(Miller, Robert B.) 1: 27

Washington—stratigraphy
Pleistocene: Case for periodic, colossal jokulhlaups from Pleistocene glacial Lake Missoula
(Waitt, Richard B., Jr.) 10: 1271
Quaternary: Late Quaternary vegetation near Battle Ground Lake, southern Puget Trough, Washington
(Barnosky, Cathy W.) 2: 263

Washington—volcanology
Mount Saint Helens: Proximal bedding deposits related to pyroclastic flows of May 18, 1980, Mount St. Helens, Washington
(Rowley, Peter D., *et al.*) 11: 1373

water *see also* ground water; hydrology

weathering *see also under* sedimentary petrology *under* District of Columbia; Maryland; Virginia

weathering—mechanical weathering
frost action: A theoretical model of the fracture of rock during freezing
(Walder, Joseph Scott, *et al.*) 3: 336

West Germany—geochronology
Quaternary: Laacher See Tephra; a widespread isochronous late Quaternary tephra layer in Central and Northern Europe
(van den Bogaard, Paul, *et al.*) 12: 1554

West Indies *see also* Bahamas; Barbados

West Virginia—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica; discussion
(Dennison, John M.) 12: 1595

Western Hemisphere *see also* Atlantic Ocean; Central America; North America; Pacific Ocean; South America

Western U.S. *see also* Alaska; California; Colorado; Idaho; Montana; Nevada; Oregon; Pacific Coast; Utah; Washington; Wyoming

Western U.S.—stratigraphy
Devonian: Devonian eustatic fluctuations in Euramerica
(Johnson, J. G., *et al.*) 5: 567

Western U.S.—structural geology
tectonics: Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah
(Larson, E. E., *et al.*) 11: 1364

Wisconsin—geochronology
Proterozoic: The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101

Wisconsin—stratigraphy
Pleistocene: Correlation of late Wisconsin glacial phases in the western Great Lakes area
(Attig, John W., *et al.*) 12: 1585
Proterozoic: Two early Proterozoic successions in central Wisconsin and their tectonic significance; alternative interpretation and reply
(Maass, R. S., *et al.*) 10: 1340

Wisconsin—structural geology
structural analysis: Florence-Niagara Terrane; an early Proterozoic accretionary complex, Lake Superior region, U.S.A.
(Larue, D. K., *et al.*) 9: 1179
tectonics: The Dunbar gneiss-granitoid dome; implications for early Proterozoic tectonic evolution of northern Wisconsin
(Sims, P. K., *et al.*) 9: 1101
— Two early Proterozoic successions in central Wisconsin and their tectonic significance; alternative interpretation and reply
(Maass, R. S., *et al.*) 10: 1340

Wyoming—geochemistry
trace elements: Isotopic studies of the late Archean plutonic rocks of the Wind River Range, Wyoming
(Stuckless, J. S., *et al.*) 7: 850

Wyoming—geochronology
Archean: Isotopic studies of the late Archean plutonic rocks of the Wind River Range, Wyoming
(Stuckless, J. S., *et al.*) 7: 850

Wyoming—hydrogeology
ground water: Process and rate of dedolomitization; mass transfer and ^{14}C dating in a regional carbonate aquifer; extended interpretation and reply
(Konikow, Leonard F., *et al.*) 8: 1096

Wyoming—petrology
igneous rocks: High-potassium intrusive rocks of the Crandall ring-dike complex, Absaroka Mountains, Wyoming
(Kudo, A. M., *et al.*) 4: 522

Wyoming—stratigraphy
Archean: Archean stromatolites from the Hartville Uplift, eastern Wyoming
(Hofmann, H. J., *et al.*) 7: 842

Wyoming—structural geology
tectonics: Gravity-spreading origin of the Heart Mountain Allochthon, northwestern Wyoming
(Haugh, Thomas A.) 11: 1440

Zimbabwe—stratigraphy
Proterozoic: The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo mobile belt, Southern Africa
(Morgan, Gerald E.) 5: 663

zoogeography *see* biogeography

Geological Society of America Bulletin

Volume 96
Contents

JANUARY

1–14 Major dextral transcurrent displacements along the Northern Rocky Mountain Trench and related lineaments in north-central British Columbia . . . . *H. Gabrielse*

15–26 Tectonics of the Seiad massif, northern Klamath Mountains, California . . . . *M. Cannat*

27–42 The ophiolitic Ingalls Complex, north-central Cascade Mountains, Washington . . . . *Robert B. Miller*

43–48 Tectonic setting of the southern Cascade Range as interpreted from its magnetic and gravity fields . . . . *Richard J. Blakely, Robert C. Jachens, Robert W. Simpson, and Richard W. Couch*

49–57 Seismicity, seismic reflection studies, gravity and geology of the central Virginia seismic zone: Part I. Seismicity . . . . *G. A. Bollinger and M. S. Sibol*

58–76 The Goban Spur transect: Geologic evolution of a sediment-starved passive continental margin . . . . *Pierre Charles de Graciansky, C. Wylie Poag, Robert Cunningham, Jr., Paul Loubere, Douglas G. Masson, James M. Mazzullo, Lucien Montadert, Carla Müller, Kenichi Otsuka, Leslie A. Reynolds, Jacques Sigal, Scott W. Snyder, Hillary A. Townsend, Stephanos P. Vaos, and Douglas Waples*

77–82 Tephrochronology of marine tephra adjacent to Central America . . . . *Michael T. Ledbetter*

83–91 Early Cretaceous volcanism on the northeastern American margin and implications for plate tectonics . . . . *L. F. Jansa and Georgia Pe-Piper*

92–107 Early Jurassic sedimentation of a rift-valley lake: Culpeper basin, northern Virginia . . . . *Tucker F. Hentz*

108–113 Petrology and geochemistry of the Paliza Canyon Formation and the Bearhead Rhyolite, Keres Group, Jemez Mountains, New Mexico . . . . *Kevin P. Guilbeau and A. M. Kudo*

114–122 Rb-Sr evidence for punctuated illite/smectite diagenesis in the Oligocene Frio Formation, Texas Gulf Coast . . . . *John P. Morton*

123–136 $^{40}Ar/^{39}Ar$ and K-Ar data bearing on the metamorphic and tectonic history of western New England . . . . *John F. Sutter, Nicholas M. Ratcliffe, and Samuel B. Mukasa*

137–144 The surface of Venus as revealed by the Venera landings: Part II . . . . *A. T. Basilevsky, R. O. Kuzmin, O. V. Nikolaeva, A. A. Pronin, L. B. Ronca, V. S. Avduevsky, G. R. Uspensky, Z. P. Cheremukhina, V. V. Semenchenko, and V. M. Ladygin*

145–154 A pollen study of a late Quaternary peat bog, south-central Adirondack Mountains, New York . . . . *Jonathan T. Overpeck*

155–157 Till stratigraphy in the St. Lawrence Valley near Malone, New York: Revised glacial history and stratigraphic nomenclature: Discussion and reply.
Discussion . . . . *Aleksis Dreimanis*
Reply . . . . *Peter Clark and P. F. Karrow*

158 Comments

FEBRUARY

159–175 K-Ar and $^{40}Ar/^{39}Ar$ dating of the hominid-bearing Pliocene-Pleistocene sequence at Koobi Fora, Lake Turkana, northern Kenya . . . . *Ian McDougall*

176–189 Dissolution and water-mass patterns in the Southeast Indian Ocean, Part I: Evidence from Recent to late Holocene foraminiferal assemblages . . . . *Douglas F. Williams, Nancy Healy-Williams, and Pamela Leschak*

190–202 Dissolution and water-mass patterns in the Southeast Indian Ocean, Part II: The Pleistocene record from Brunhes to Matuyama age sediments . . . . *Douglas F. Williams, David Gribble, Nancy Healy-Williams, and Pamela Leschak*

203–217 Sapping processes and the development of theater-headed valley networks on the Colorado Plateau . . . . *Julie E. Laity and Michael C. Malin*

218–223 Bed microtopography and entrainment thresholds in gravel-bed rivers . . . . *Andrew C. Brayshaw*

224–232 Revised interpretation of the age of allochthonous rocks of the Uncompahgre Formation, Needle Mountains, Colorado . . . . *B. J. Tewksbury*

233-243 Structure and deformation history of the Bitlis suture near Lake Hazar, southeastern Turkey . . . . *Mark R. Hempton*

244–252 Sedimentological constraints on the origins of Precambrian iron-formations . . . . *Bruce M. Simonson*

253–262 Simulation of changes in ground-water levels associated with strip mining . . . . *Franklin W. Schwartz and Allan S. Crowe*

263–271 Late Quaternary vegetation near Battle Ground Lake, southern Puget Trough, Washington . . . . *Cathy W. Barnosky*

272–282 Late Proterozoic and Devonian plutonic terrane within the Avalon zone of Rhode Island . . . . *O. Don Hermes and Robert E. Zartman*

283 Comments

MARCH

285–295 Stratigraphy and tectonics of the Virginia–North Carolina Blue Ridge: Evolution of a late Proterozoic–early Paleozoic hinge zone . . . . *Frederick Wehr and Lynn Glover III*

296–312 The petrology and geochemistry of the Ocate volcanic field, north-central New Mexico . . . . *Roger L. Nielsen and Michael A. Dungan*

313–327 Nontransform offsets of the Pacific-Cocos plate boundary and their traces on the rise flank . . . . *Peter Lonsdale*

328–335 The displacement of connate water from aquifers . . . . *P. A. Domenico and G. A. Robbins*

336–346 A theoretical model of the fracture of rock during freezing . . . . *Joseph Walder and Bernard Hallet*

347–361 Neogene paleostress changes in the Basin and Range: A case study at Hoover Dam, Nevada-Arizona . . . . *Jacques Angelier, Bernard Colletta, and R. Ernest Anderson*

362–380 Tectonic evolution of the easternmost Piedmont, North Carolina . . . . *Stewart S. Farrar*

381–387 Alleghanian deformation and metamorphism in the eastern North Carolina Piedmont . . . . *Gail S. Russell, C. Winston Russell, and Stewart S. Farrar*

388–397 Subglacial hydrology and sediment transport at Bondhusbreen, southwest Norway . . . . *Roger LeB. Hooke, Bjørn Wold, and Jon Ove Hagen*

398–406 Uranium-series dating of fossil corals from marine sediments of southeastern United States Atlantic Coastal Plain . . . . *Barney J. Szabo*

407–408 An outline of the plate tectonics of China: Discussion and reply
Discussion . . . . *Michael P. Klimetz*
Reply . . . . *Zh. M. Zhang, J. G. Liou, and R. G. Coleman*

409–410 Storm-controlled oblique dunes of the Oregon coast: Discussion and reply
Discussion . . . . *M. A. Carson and P. A. MacLean*
Reply . . . . *Ralph E. Hunter, Bruce M. Richmond, and Tau Rho Alpha*

APRIL

411–425 Petrology and tectonic significance of augen gneiss from a belt of Mississippian granitoids in the Yukon-Tanana terrane, east-central Alaska . . . . *Cynthia Dusel-Bacon and John N. Aleinikoff*

426–435 Distribution and mechanisms of strain within rocks on the northwest ramp of Pine Mountain block, southern Appalachian foreland: A field test of theory . . . . *David V. Wiltschko, Donald A. Medwedeff, and Henry E. Millson*

436–450 Structure and tectonics of the northern Sierra Nevada . . . . *Howard W. Day, E. M. Moores, and A. C. Tuminas*

451–462 Structural styles in Mesozoic and Cenozoic mélanges in the western Cordillera of North America . . . . *Darrel S. Cowan*

463–480 Paleomagnetism and oxide mineralogy of Upper Triassic to Lower Jurassic red beds and basalts in the Newark Basin . . . . *W. C. McIntosh, R. B. Hargraves, and C. L. West*

481–494 Erosional modification of Bahama Escarpment . . . . *R. P. Freeman-Lynde and W.B.F. Ryan*

495–503 Late Pliocene reorganization of deep vertical water-mass structure in the western South Atlantic: Faunal and isotopic evidence . . . . *David A. Hodell, Douglas F. Williams, and James P. Kennett*

504–515 Response of alluvial rivers to slow active tectonic movement . . . . *Shunji Ouchi*

516–521 Petrology and provenance of pre–Late Devonian sandstones, Shoo Fly Complex, northern Sierra Nevada, California . . . . *Gary H. Girty and Melissa S. Wardlaw*

522–528 High-potassium intrusive rocks of the Crandall ring-dike complex, Absaroka Mountains, Wyoming . . . . *A. M. Kudo and David E. Broxton*

529–538 Isotopic ages, magnetostratigraphy, and biostratigraphy from the early Pliocene Suva Marl, Fiji . . . . *P. Rodda, I. McDougall, R. A. Cassie, D. A. Falvey, R. Todd, and J. A. Wilcoxon*

539–552 The magnetostratigraphy, fission-track dating, and stratigraphic evolution of the Peshawar intermontane basin, northern Pakistan . . . . *Douglas W. Burbank and R. A. Khan Tahirkheli*

553–566 Quaternary volcanic stratigraphy of Managua, Nicaragua: Correlation and source assignment for multiple overlapping plinian deposits . . . . *David C. Bice*

MAY

567–587 Devonian eustatic fluctuations in Euramerica . . . . *J. G. Johnson, Gilbert Klapper, and C. A. Sandberg*

588–599 Granulites at Winding Stair Gap, North Carolina: The thermal axis of Paleozoic metamorphism in the southern Appalachians . . . . *B. Steven Absher and Harry Y. McSween, Jr.*

600–617 Structure, petrology, and metamorphic history of the Nome Group blueschist terrane, Salmon Lake area, Seward Peninsula, Alaska . . . . *Stephen Pollock Thurston*

618–626 A scenario of Mesozoic-Cenozoic ocean circulation over the Blake Plateau and its environs . . . . *Paul R. Pinet and Peter Popenoe*

627–638 Shallow seismic stratigraphy and post-Albian geologic history of the northern and central Blake Plateau . . . . *Paul R. Pinet and Peter Popenoe*

639–646 Esker characteristics in terms of glacier physics, Katahdin esker system, Maine . . . . *Ronald L. Shreve*

647–654 Implications of the northwestwardly younger age of the volcanic rocks of west-central California . . . . *Kenneth F. Fox, Jr., Robert J. Fleck, Garniss H. Curtis, Charles E. Meyer*

655–662 Geochemistry and origin of early Proterozoic supracrustal rocks, Dos Cabezas Mountains, southeastern Arizona . . . . *Kent C. Condie, G. Patrick Bowling, and R. K. Vance*

663–675 The paleomagnetism and cooling history of metamorphic and igneous rocks from the Limpopo Mobile Belt, southern Africa . . . . *Gerald E. Morgan*

676–690 Genetic interpretation of lead-isotopic data from the Columbia River Basalt Group, Oregon, Washington, and Idaho . . . . *S. E. Church*

JUNE

691–701 Mechanisms of subduction accretion along the central Aleutian Trench . . . . *Jill McCarthy and David W. Scholl*

702–709 Eolian deflation by ancient katabatic winds: A late Quaternary example from the north Alaska Range . . . . *Robert M. Thorson and Gary Bender*

710–718 Large-scale, thin-skinned thrusting in the southern Alps: Kinematic models . . . . *H. P. Laubscher*

719–730 Paleomagnetic and petrologic evidence bearing on the age and origin of uranium deposits in the Permian Cutler Formation, Lisbon Valley, Utah . . . . *Richard L. Reynolds, Mark R. Hudson, Neil S. Fishman, and John A. Campbell*

731–736 Metamorphism of pelitic rocks in the Snow Peak area, northern Idaho: Sequence of events and regional implications . . . . *Helen M. Lang and Jack M. Rice*

737–745 Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona: Implications for the timing and development of a terrestrial plant cover . . . . *Mark A. Beeunas and L. Paul Knauth*

746–754 Rapid production of continental crust 1.7 to 1.9 b.y. ago: Nd isotopic evidence from the basement of the North American mid-continent . . . . *Bruce K. Nelson and Donald J. DePaolo*

755–769 The geology of the McCoy Mountains Formation, southeastern California and southwestern Arizona . . . . *Lucy E. Harding and Peter J. Coney*

770–780 Isotopic provenance of sandstones from the Eocene Tyee Formation, Oregon Coast Range . . . . *Paul L. Heller, Zell E. Peterman, James R. O'Neil, and Muhammad Shafiqullah*

781–792 Bank-erosion processes in a cool-temperate environment, Orwell Lake, Minnesota . . . . *John R. Reid, Jr.*

793–812 Holocene rate of slip and tentative recurrence interval for large earthquakes on the San Andreas fault, Cajon Pass, southern California . . . . *Ray J. Weldon II and Kerry E. Sieh*

813–815 Numerical ages of Cenozoic biostratigraphic datum levels: Results of South Atlantic Leg 73 drilling: Discussion and reply
Discussion . . . . *David Bukry*
Reply . . . . *Kenneth J. Hsü*

816 Mesozoic deep-water and Tertiary volcaniclastic deposition of Maio, Cape Verde Islands: Discussion and reply
Discussion . . . . . *Robert W. Milam*
Reply . . . . *A.H.F. Robertson*

JULY

817–826 Pan-African microplate accretion of the Arabian Shield . . . . *Douglas B. Stoeser and Victor E. Camp*

827–831 Correlation of Gulf Coast provincial Paleogene stages with European standard stages . . . . *William G. Siesser, Brenda G. Fitzgerald, and David J. Kronman*

832–841 Late Pleistocene sedimentation on the continental slope and rise off western Nova Scotia . . . . *Stephen A. Swift*

842–849 Archean stromatolites from the Hartville Uplift, eastern Wyoming . . . . *H. J. Hofmann and G. L. Snyder*

850–860 Isotopic studies of the late Archean plutonic rocks of the Wind River Range, Wyoming . . . . *J. S. Stuckless, C. E. Hedge, R. G. Worl, K. R. Simmons, I. T. Nkomo, and D. B. Wenner*

861–874 Tectonic relationships between forearc-basin strata and the accretionary complex at Bath, Barbados . . . . *Rudolph Torrini, Jr., Robert C. Speed, and Glen S. Mattioli*

875–885 Structure of the Vakhsh fold-and-thrust belt, Tadjik SSR: Geologic mapping on a Landsat image base . . . . *William Leith and Walter Alvarez*

886–900 Saprolite formation beneath Coastal Plain sediments near Washington, D.C. . . . . *M. J. Pavich and S. F. Obermeier*

901–910 Sediments of the Lomonosov Ridge and Makarov Basin: A Pleistocene stratigraphy for the North Pole . . . . *Thomas H. Morris, David L. Clark, and Steven M. Blasco*

911–917 Topographic inversion of badland buttes in Montana . . . . *John J. Donahue*

918–924 Pre-Andean orogenesis in the Coast Ranges of central Chile . . . . *Terence T. Kato*

925–930 Provenance of the Silurian Elder Sandstone, north-central Nevada . . . . *Gary H. Girty, Drue N. Reiland, and Melissa S. Wardlaw*

931–939 Emplacement of the zoned Zaer pluton, Morocco . . . . *Ahmed Mahmood*

940–951 Silicic volcanism at an off-axis geothermal field in the Mariana Trough back-arc basin . . . . *Peter Lonsdale and James Hawkins*

952–967 Topographic lineament swarms: Clues to their origin from domain analysis of Italy . . . . *Donald U. Wise, Renato Funiciello, Maurizio Parotto, and Francesco Salvini*

968–974 Correlation of ash-flow tuffs . . . . *Wes Hildreth and Gail Mahood*

AUGUST

975–989 New York Bight fault . . . . *D. R. Hutchinson and John A. Grow*

990–996 Carboniferous U-Pb age of the Sebago batholith, southwestern Maine: Metamorphic and tectonic implications . . . . *John N. Aleinikoff, Robert H. Moench, and John B. Lyons*

997–1006 Petrologic evidence for Jurassic, island-arc–like basement rocks in the southwestern Transverse Ranges and California Continental Borderland . . . . *Sorena Sorensen*

1007–1019 Stratigraphy and sedimentology of Upper Cretaceous rocks in coastal southwest Oregon: Evidence for wrench-fault tectonics in a postulated accretionary terrane . . . . *Joanne Bourgeois and R. H. Dott, Jr.*

1020–1036 Migration of glacial centers across Gondwana during Paleozoic Era . . . . *Mário V. Caputo and John C. Crowell*

1037–1042 Modern tectonic cracking near the Garlock fault, California . . . . *John T. Zellmer, Glenn R. Roquemore, and Bruce A. Blackerby*

1043–1049 Rb-Sr dating of diagenesis and source age of clays in Upper Devonian black shales of Texas . . . . *John P. Morton*

1050–1055 The Siquisique ophiolites, Northern Lara State, Venezuela: A discussion on their Middle Jurassic ammonites and tectonic implications . . . . *P. E. Bartok, O. Renz, and G.E.G. Westermann*

1056–1069 Initiation and flow behavior of the 1980 Pine Creek and Muddy River lahars, Mount St. Helens, Washington . . . . *Thomas C. Pierson*

1070–1076 Geophysical evidence for an allochthonous Alleghanian(?) granitoid beneath the basement surface of the Coastal Plain near Lumberton, North Carolina . . . . *T. L. Pratt, J. K. Costain, C. Coruh, L. Glover III, and E. S. Robinson*

1077–1090 Mesozoic paleomagnetism and northward translation of the Baja California Peninsula . . . . *Jonathan T. Hagstrum, Michael McWilliams, David G. Howell, and Sherman Grommé*

1091–1094 Landslides caused by earthquakes: Discussion and reply
Discussion . . . . *T. Leslie Youd*
Reply . . . . *David K. Keefer*

1095 Fundamental characteristics of stream meanders: Discussion . . . . *William F. Tanner*

1096–1099 Process and rate of dedolomitization: Mass transfer and ^{14}C dating in a regional carbonate aquifer: Extended interpretation and reply
Extended interpretation . . . . *Leonard F. Konikow*
Reply . . . . *William Back, Bruce B. Hanshaw, L. Niel Plummer, Perry R. Rahn, Craig T. Rightmire, and Meyer Rubin*

1100 Comments

SEPTEMBER

1101–1112 The Dunbar Gneiss-granitoid dome: Implications for early Proterozoic tectonic evolution of northern Wisconsin . . . . *P. K. Sims, Z. E. Peterman, and K. J. Schulz*

1113–1130 Structure of the Havallah sequence, Golconda allochthon, Nevada: Evidence for prolonged evolution in an accretionary prism . . . . *Hannes K. Brueckner and Walter S. Snyder*

1131–1139 Differentiation of Mesozoic basalts of the Hartford basin, Connecticut . . . . *Anthony R. Philpotts and Ingrid Reichenbach*

1140–1155 Miocene low-angle normal faulting and dike emplacement, Homer Mountain and surrounding areas, southeastern California and southernmost Nevada . . . . *Jon E. Spencer*

1156–1166 Correlation of east Australian Pleistocene shorelines with deep-sea core stages: A basis for a coastal chronology . . . . *W. T. Ward*

1167–1178 Accretion-related deformation of an ancient (early Paleozoic) trench-fill deposit, central Appalachian orogen . . . . *Gary G. Lash*

1179–1187 Florence-Niagara terrane: An early Proterozoic accretionary complex, Lake Superior region, U.S.A. . . . . *D. K. Larue and W. L. Ueng*

1188–1193 Keweenawan-age caliche paleosol in the lower part of the Calumet and Hecla Conglomerate, Centennial Mine, Calumet, Michigan . . . . *J. Kalliokoski and Edwin J. Welch*

1194–1212 Medals and Awards for 1984

1213–1220 Correlation of the subsurface Lower and Middle Devonian of the Lake Erie region: Alternative interpretation and reply
Alternative interpretation . . . . *Dale R. Sparling*
Reply . . . . *Lawrence V. Rickard*

1221–1222 Ophiolitic source rocks for Taconic-age flysch: Trace-element evidence: Discussion and reply
Discussion . . . . *G. Shanmugam*
Reply . . . . *Richard N. Hiscott*

1223–1224 Late Pleistocene water bodies in the St. Lawrence Lowland, New York, and regional correlations: Discussion and reply
Discussion . . . . *Nelson R. Gadd*
Reply . . . . *Peter Clark and P. F. Karrow*

1225–1226 Geology and paleobiology of islands in the Ordovician Iapetus Ocean: Review and implications: Discussion and reply
Discussion . . . . *Wes Gibbons*
Reply . . . . *Robert B. Neuman*

OCTOBER

1227–1250 Tectonic synthesis of the Taconian orogeny in western New England . . . . *Rolfe S. Stanley and Nicholas M. Ratcliffe*

1251–1270 Origin and tectonic evolution of the Maclaren and Wrangellia terranes, eastern Alaska Range, Alaska . . . . *Warren J. Nokleberg, David L. Jones, and Norman J. Silberling*

1271–1286 Case for periodic, colossal jökulhlaups from Pleistocene glacial Lake Missoula . . . . *Richard B. Waitt, Jr.*

1287–1295 Sediment–sea-water interaction at 200 and 300 °C, 500 bars pressure: The role of sediment composition in diagenesis and low-grade metamorphism of marine clay . . . . *Edward C. Thornton and William E. Seyfried, Jr.*

1296–1312 Depositional environments in the Monterey Formation, Cuyama Basin, California . . . . *Martin B. Lagoe*

1313–1321 Defining the nature and location of a Late Devonian–Early Mississippian pycnocline in eastern Kentucky . . . . *Frank R. Ettensohn and Timothy D. Elam*

1322–1331 Stratigraphic and sedimentologic evidence of a submarine island-arc volcano in the lower Mesozoic Peñon Blanco and Jasper Point Formations, Mariposa County, California . . . . *Nicholas L. Bogen*

1332–1339 Late Precambrian and early Paleozoic tectonism and associated sedimentation in northern Victoria Land, Antarctica . . . . *Thomas O. Wright*

1340–1346 Two early Proterozoic successions in central Wisconsin and their tectonic significance: Alternative interpretation and reply
Alternative interpretation . . . . *R. S. Maass, B. A. Brown, and J. K. Greenberg*
Reply . . . . *Gene L. LaBerge and Paul E. Myers*

1346–1352 Timing and structural expression of the Nevadan orogeny, Sierra Nevada, California: Discussions and reply
Discussion . . . . *Tapas Bhattacharyya and Scott R. Paterson*
Discussion . . . . *Othmar T. Tobisch and Richard S. Fiske*
Reply . . . . *Richard A. Schweickert, Nicholas L. Bogen, Gary H. Girty, Richard E. Hanson, and Charles Merguerian*

NOVEMBER

1353–1363 Textures of Paleozoic chert and novaculite in the Ouachita Mountains of Arkansas and Oklahoma and their geological significance . . . . *Walter D. Keller, Charles G. Stone, and Alice L. Hoersch*

1364–1372 Petrologic, paleomagnetic, and structural evidence of a Paleozoic rift system in Oklahoma, New Mexico, Colorado, and Utah . . . . *E. E. Larson, P. E. Patterson, G. Curtis, R. Drake, and F. E. Mutschler*

1373–1383 Proximal bedded deposits related to pyroclastic flows of May 18, 1980, Mount St. Helens, Washington . . . . *Peter D. Rowley, Norman S. MacLeod, Mel A. Kuntz, and Allan M. Kaplan*

1384–1397 Intercontinental correlation by sea-level events in the Early Silurian of North America and China (Yangtze Platform) . . . . *Markes E. Johnson, Rong Jia-Yu, and Yang Xue-Chang*

1398–1406 Geology and genesis of manganese oolite, Chiatura, Georgia, U.S.S.R. . . . . *Barrie R. Bolton and Lawrence A. Frakes*

1407–1418 Cenozoic geochronology . . . . *William A. Berggren, Dennis V. Kent, John J. Flynn, and John A. Van Couvering*

1419–1427 A Cretaceous and Jurassic geochronology . . . . *Dennis V. Kent and Felix M. Gradstein*

1428–1439 A Proterozoic granulite-facies terrane on Roan Mountain, western Blue Ridge belt, North Carolina–Tennessee . . . . *Gerald L. Gulley, Jr.*

1440–1456 Gravity-spreading origin of the Heart Mountain allochthon, northwestern Wyoming . . . . *Thomas A. Hauge*

1457–1465 Morphology of a delta prograding by bulk sediment transport . . . . *P. M. Kenyon and D. L. Turcotte*

1466–1476 The Annieopsquotch ophiolite belt of southwest Newfoundland: Geology and tectonic significance . . . . *G. R. Dunning and L. B. Chorlton*

DECEMBER

1477–1482 Geology and geochronology of the Tomochic caldera, Chihuahua, Mexico . . . . *Eric R. Swanson and Fred W. McDowell*

1483–1492 Archaeological geology of the Lubbock Lake site, Southern High Plains of Texas . . . . *Vance T. Holliday*

1493–1507 Trondhjemite and metamorphosed quartz keratophyre tuff of the Ammonoosuc Volcanics (Ordovician), western New Hampshire and adjacent Vermont and Massachusetts . . . . *Gerhard W. Leo*

1508–1517 Late Quaternary slumps and debris flows on the Scotian Slope . . . . *David J. W. Piper, J. A. Farre, and A. Shor*

1518–1529 Late Cenozoic landscape evolution on lava flow surfaces of the Cima volcanic field, Mojave Desert, California . . . . *Stephen G. Wells, John C. Dohrenwend, Leslie D. McFadden, Brent D. Turrin, and Kenneth D. Mahrer*

1530–1536 Eocene amber from the Pacific Coast of North America . . . . *George E. Mustoe*

1537–1553 Glacial and syntectonic sedimentation: The upper Proterozoic Kingston Peak Formation, southern Panamint Range, eastern California . . . . *Julia M. G. Miller*

1554–1571 Laacher See Tephra: A widespread isochronous late Quaternary tephra layer in central and northern Europe . . . . *Paul v.d. Bogaard and Hans-Ulrich Schmincke*

1572–1579 U-Pb ages from the Nipigon plate and northern Lake Superior . . . . *D. W. Davis and R. H. Sutcliffe*

1580–1584 Seismicity, seismic reflection, gravity, and geology of the central Virginia seismic zone: Part 3. Gravity . . . . *M. R. Keller, E. S. Robinson, and Lynn Glover III*

1585–1593 Correlation of late Wisconsin glacial phases in the western Great Lakes area . . . . *John W. Attig, Lee Clayton, and David M. Mickelson*

1594–1595 Preserved stable isotopic signature of subaerial diagenesis in the 1.2-b.y. Mescal Limestone, central Arizona: Implications for the timing and development of a terrestrial plant cover: Discussion and reply
Discussion . . . . *Jane Gray*
Reply . . . . *Mark A. Beeunas and L. Paul Knauth*

1595–1597 Devonian eustatic fluctuations in Euramerica: Discussion . . . . *John M. Dennison*

1597–1599 Geology and paleobiology of islands in the Ordovician Iapetus Ocean: Discussion and reply
Discussion . . . . *D.A.T. Harper and D. L. Bruton*
Reply . . . . *Robert B. Neuman and Brian A. Sturt*
